Q1 Is there a need for Government of India to upgrade its holistic National population policy 2000? Analyse.

National population policy 2000 is to address the unmeet needs for contraception, healthcare, infrastructure, health personnel & to provide integrated service delivery for basic reproductive & child health care.

- India's fertility rate is declined by 2.1 birth. India is focusing on population control or 2 child policy. rather than population welfare

- In china they adopt 1 child policy or now they faced a problem of elderly. china youth population becoming aged or it will affects its economy in future. people are not ready to revive 2 child policy.

- In India 12% of India's total population ~~is goi by~~ 2025 is going to be elderly.

- India should focus on demographic dividend because our youth need economic & social opportunity, otherwise demographic dividend become ~~disastor~~ disaster.

- India should invest in youth population Provide them employment, good health facilities, education,

- benefits provide to elederly people like pension, those who are not in a list of pension policy. provide or registered their name,

- Make ~~sme~~ some policies of our youth those will convert in ageing by 2025.

- we should not focus on fertility rate, population control, but giving them benefits & use as a resources, where they ~~go~~ can secure or establish itself.

- we made in accelerating education, delying child marriage, addressing sexual

& reproductive health needs & building agency be wasted.

•) we should take the lesson from china for controlling population.

Yes, Indian Government should need a stand to upgrade its National population policy rather than move away from the focus on the two-child norm.
