

## **Akash missile and economic growth**

### **Why in news?**

\n\n

The indigenously produced Akash missile system will help modernisation of defence and boost economic growth.

\n\n

### **What are the significance of Akash missile?**

\n\n

\n

- Akash is a medium-range, surface-to-air missile defence system.
- It is developed by the Defence Research and Development Organisation (DRDO).
- The missile system can target aircraft up to 30 km away, at altitudes up to 18,000 m.
- It consists of a Rohini radar that detects incoming aircraft at ranges out to 120 km and relays the information to a command post.
- It has the capability to "neutralise aerial targets like fighter jets, cruise missiles and air-to-surface missiles" as well as ballistic missiles.
- It is in operational service with the Indian Army and the Indian Air Force.

\n\n

### **What are the issues with Akash production?**

\n\n

\n

- The production of Akash missiles is not under single body, DRDO develops only foundational technologies.
- Numerous private sector companies will develop crucial sub-systems.

- \n
- While 330 smaller private firms feed into the Akash's production as Tier-2 and Tier-3 vendors.
  - Two defence public sector undertakings Bharat Electronics Ltd (BEL) and Bharat Dynamics Ltd (BDL) will function as "systems integrators" that put the entire system together.
  - The Akash production chain stands empty as the defence ministry bargains with BEL over the cost of its next order.
  - Due to various norms the indigenous manufacturers face many difficulties in production.
  - The cost of the missile stands high when compared with equivalent foreign systems.
  - So far Akash had proved its effectiveness against a target far smaller than a combat aircraft.
  - Due this Indian defence agencies are procuring missiles from foreign nations.
- \n

\n\n

### **How Akash will help in defence modernization and economy?**

\n\n

- \n
- Technological updates will make Akash more accurate and capable of longer ranges.
  - Producing the Akash in India provides employment, a key aim of the "**Make in India**" programme.
  - Procuring Akash by various defence departments of India will create a multiplier effect at multiple levels of our economy.
  - Facilitating the development of defence systems in India creates strategic intellectual property.
  - The Akash production will teach India about the dynamics of mass production, maintenance and spares support and upgrading it to the next level.
