

Amazon's Entry into Food Retailing

Why in news?

\n\n

\n

- Amazon.com Inc has secured approval to stock and sell food and groceries in India.
- It is the first under the policy allowing 100% foreign direct investment (FDI) in food retail chains.

\n

\n\n

What is FDI?

\n\n

\n

- It is an investment made by a company or individual in one country in business interests in another country.
- FDI are distinguished from portfolio investments (FII) in which an investor merely purchases equities of foreign-based companies.

\n

\n\n

What about FDI in India?

\n\n

\n

- Economic liberalisation started in India in wake of the 1991 economic crisis and since then FDI has steadily increased in India.
- In 2015 **India overtook China and the US** as the top destination for the FDI.
- Measures taken by the Government are directed to open new sectors for FDI.
- There are two routes by which India gets FDI.

- \n
- **Automatic route** - By this route FDI is allowed without prior approval by Government or Reserve Bank of India.
- \n
- **Government route** - Prior approval by government is needed via this route.
- \n
- The government currently allows 100% FDI in the food retail business.
- \n

\n\n

What are the implications of the current move?

\n\n

- \n
- The government's approval for Amazon could be a good opportunity to scrap the confusing conditions that prevail in the retail investment policy.
- \n
- Big-ticket retail FDI has the potential to **significantly expand the market for goods and services**.
- \n
- FDI inflow comes with the latest technologies, products and processes.
- \n
- It helps farmers to some extent.
- \n
- A food store would generally prefer to have a **tie-up with a group of farmers** to pick up their produce as it ensures them steady and quality supply while ensuring they have control on the prices.
