

Asian Elephant Conservation

Why in News?

Interim Elephant Census report has highlighted declining elephant population across India.

Asian Elephants

- Asian Elephant is the natural heritage animal of India and the largest mammal living on the land of Asia.
- **Scientific name** - *Elephas maximus*
- **Gestation period** - 22 months
- **Weight** - 3,000-6,000 kg
- **Height**
 - Males - up to 9 feet
 - Females - up to 7.9 feet
- **Lifespan** - 48 years (average in the wild)
- **Tusks** - Larger in males, smaller or absent in females
- **Intelligence** - Highly intelligent, known for empathy, mourning, and communication
- **Social Structure** - Matriarchal herds, males generally solitary
- **IUCN Red List** - Endangered
- **Wildlife Protection Act 1972** - Schedule I
- **CITES** - Appendix I
- **Population** - There are about 50,000-60,000 Asian elephants in the world.
- **Indian Population** - More than 60% of the world's elephant population is in India.
- **Distribution** - The current distribution of wild elephant in India is now restricted to four general areas
 - North-eastern India,
 - Central India,
 - North-western India,
 - Southern India.
- Karnataka has the highest number of elephants (6,049)
- Assam (5,719) and Kerala (3,054).
- **Elephant reserves** - There are 33 elephant reserves in India, latest being Terai Elephant Reserve in Uttar Pradesh.

ELEPHANT NUMBERS IN INDIA (2012-2023)

States	2012	2017	2022-23	Change
Tamil Nadu	4015	2761	3136	13.6%
Karnataka	6068	6049	6013	-0.6%
Kerala	6117	5706*	2785	-51.2%
Maha (W Ghat)	4	6	27	350%
Western Ghats	16204	14522	11961	-17.6%
WB (South)	0	194	31	-84%
Jharkhand	688	679	217	-68%
Odisha	1930	1976	912	-54%
Chhattisgarh	247	247	451	82.6%
Madhya Pradesh	0	7	97	1286%
Maha (Gadchiroli)	0	0	36	NA
Andhra Pradesh	41	65	120	84.6%
Central & Eastern	2906	3168	1864	-41%
Uttarakhand	1346	1839	1792	-2.6%
Uttar Pradesh	291	232	257	11%
Bihar	0	25	13	-48%
Shivalik-Gangetic	1637	2096	2062	-1.6%
Haryana	0	7	0	NA
Himachal Pradesh	0	7	0	NA
A&N	0	25	NA	NA
India (Except NE)	20747	19825	15887	-20%
Arunachal Pradesh	890	1614	Pending	NA
Assam	5620	5719	1031^	NA
Megalaya	1811	1754	Pending	NA
Nagaland	212	446	Pending	NA
Mizoram	0	7	Pending	NA
Manipur	0	9	Pending	NA
Tripura	59	102	Pending	NA
WB (North)	647	488	423^^	NA
North East	9239	10139	9866#	NA

* Revised count. Initial count was 3054

NE figures are extrapolated from 2017, count pending

How Elephant census is conducted?

- **Elephant Census** - It is a synchronized census conducted region wise.
- It is conducted **every 5 years** by the **Wildlife Institute of India** (WII), an autonomous body under the ministry.
- **Census Methods**
 - Direct (head) count - Forest divisions is divided into sample blocks ranging from 4 to 6 sq km.
 - Indirect (dung) count
 - waterhole count method - Identifying waterbodies frequented by the elephants.
 - DNA profiling
 - Camera traps
 - Statistical modelling based on mark-recapture
- Till 2017 Direct and Indirect method only used and Scientific estimation is being used in this years' census.

Regional Elephant Population Decline and Threats		
Region	Declining % (Compared with 2017 Estimate)	Threats
Central Indian and Eastern Ghats	41 %	<ul style="list-style-type: none"> • Unmitigated mining • Linear infrastructure construction • developmental projects
Southern West Bengal, and	84%	
Jharkhand	68%	
Orissa	54%	
Western Ghats	About 18 %	<ul style="list-style-type: none"> • Commercial plantations (coffee and tea) • Farmland fencing • Human encroachment
Kerala -	Nearly 51% (2,900)	
Shivalik-Terai population in Uttarakhand and Uttar Pradesh	2%	<ul style="list-style-type: none"> • Encroachments • Forest clearing • Monoculture • Invasive species • Intensified agriculture • Linear infrastructure
North East	Data Not Available	<ul style="list-style-type: none"> • Human habitations • Tea plantations • Mines, oil refineries • Linear infrastructure

What are the impacts of declining elephant population?

- **Human Animal Conflict** - Threats have pushed elephants to venture into historical but currently unoccupied areas fuelling human-elephant conflicts.
- **Retaliatory Killing** - In some cases, conflicts can escalate to retaliatory killings of elephants, further exacerbating their population decline.
- **Economic Losses** - Human-elephant conflicts can result in significant economic losses

for farmers and communities, especially in areas where agriculture is a primary livelihood.

- **Habitat Degradation** - As elephant populations decline, their role in shaping and maintaining ecosystems becomes compromised.

Elephants are ecosystem engineers and keystone species influencing vegetation structure and seed dispersal.

- **Disruption of Food Chains** - Their decline can disrupt food chains, affecting predator populations and overall ecosystem balance.
- **Reduced Seed Dispersal** - Elephants play a vital role in dispersing seeds, helping to regenerate forests and maintain plant diversity.
- **Loss of Cultural Heritage** - Elephants have deep cultural significance in India, and their decline represents a loss of cultural heritage.
- **Reduced Tourism Revenue** - Elephant tourism is a significant source of income in many parts of India.
- **Impact on Traditional Practices** - Some indigenous communities rely on elephants for their livelihoods and cultural practices.

What are the elephant's conservation initiatives?

- **Area Conservation** - There are 33 elephant reserves in India aimed at conserving their population.
- **Project Elephant** - It was launched in 1992 to protect elephants, their habitat and corridors, address issues of man-animal conflict and welfare of captive elephants
- **Surveillance** - Monitoring of Illegal Killing of Elephant is launched in 10 elephant reserves since 2003.
- **Stop Poaching** - Anti-poaching units have been formed to patrol elephant habitats and apprehend poachers.
- **Prevent Wildlife Crime** - Special Elephant task forces have been set up to address specific threats to elephant populations, such as ivory smuggling.
- **Compensation** - Community compensation schemes are in place to reimburse farmers for crop damage caused by elephants.
- **Surveys** - Regular elephant surveys are conducted to assess elephant population trends and distribution.

What are the strategies to conserve elephant population?

- Strengthening [elephant corridors](#) and connectivity, restoring habitat, mitigating developmental projects, and ensuring the support of local communities for elephant conservation.
- Focused estimation exercise to comprehensively assess occupancy and abundance to devise specific conservation actions.
- Develop early warning systems to alert communities of approaching elephant herds.
- Establish community-based anti-poaching units to monitor and protect elephant habitats.
