

## Asian Elephant Conservation

### Why in News?

Interim Elephant Census report has highlighted declining elephant population across India.

### Asian Elephants

- Asian Elephant is the natural heritage animal of India and the largest mammal living on the land of Asia.
- **Scientific name** - *Elephas maximus*
- **Gestation period** - 22 months
- **Weight** - 3,000-6,000 kg
- **Height**
  - Males - up to 9 feet
  - Females - up to 7.9 feet
- **Lifespan** - 48 years (average in the wild)
- **Tusks** - Larger in males, smaller or absent in females
- **Intelligence** - Highly intelligent, known for empathy, mourning, and communication
- **Social Structure** - Matriarchal herds, males generally solitary
- **IUCN Red List** - Endangered
- **Wildlife Protection Act 1972** - Schedule I
- **CITES** - Appendix I
- **Population** - There are about 50,000-60,000 Asian elephants in the world.
- **Indian Population** - More than 60% of the world's elephant population is in India.
- **Distribution** - The current distribution of wild elephant in India is now restricted to four general areas
  - North-eastern India,
  - Central India,
  - North-western India,
  - Southern India.
- Karnataka has the highest number of elephants (6,049)
- Assam (5,719) and Kerala (3,054).
- **Elephant reserves** - There are 33 elephant reserves in India, latest being Terai Elephant Reserve in Uttar Pradesh.

## ELEPHANT NUMBERS IN INDIA (2012-2023)

States	2012	2017	2022-23	Change
Tamil Nadu	4015	2761	3136	13.6%
Karnataka	6068	6049	6013	-0.6%
Kerala	6117	5706*	2785	-51.2%
Maha (W Ghat)	4	6	27	350%
<b>Western Ghats</b>	<b>16204</b>	<b>14522</b>	<b>11961</b>	<b>-17.6%</b>
WB (South)	0	194	31	-84%
Jharkhand	688	679	217	-68%
Odisha	1930	1976	912	-54%
Chhattisgarh	247	247	451	82.6%
Madhya Pradesh	0	7	97	1286%
Maha (Gadchiroli)	0	0	36	NA
Andhra Pradesh	41	65	120	84.6%
<b>Central &amp; Eastern</b>	<b>2906</b>	<b>3168</b>	<b>1864</b>	<b>-41%</b>
Uttarakhand	1346	1839	1792	-2.6%
Uttar Pradesh	291	232	257	11%
Bihar	0	25	13	-48%
<b>Shivalik-Gangetic</b>	<b>1637</b>	<b>2096</b>	<b>2062</b>	<b>-1.6%</b>
Haryana	0	7	0	NA
Himachal Pradesh	0	7	0	NA
A&N	0	25	NA	NA
<b>India (Except NE)</b>	<b>20747</b>	<b>19825</b>	<b>15887</b>	<b>-20%</b>
Arunachal Pradesh	890	1614	Pending	NA
Assam	5620	5719	1031^	NA
Megalaya	1811	1754	Pending	NA
Nagaland	212	446	Pending	NA
Mizoram	0	7	Pending	NA
Manipur	0	9	Pending	NA
Tripura	59	102	Pending	NA
WB (North)	647	488	423^^	NA
<b>North East</b>	<b>9239</b>	<b>10139</b>	<b>9866#</b>	<b>NA</b>

\* Revised count. Initial count was 3054

# NE figures are extrapolated from 2017, count pending

## How Elephant census is conducted?

- **Elephant Census** - It is a synchronized census conducted region wise.
- It is conducted **every 5 years** by the **Wildlife Institute of India** (WII), an autonomous body under the ministry.
- **Census Methods**
  - Direct (head) count - Forest divisions is divided into sample blocks ranging from 4 to 6 sq km.
  - Indirect (dung) count
  - waterhole count method - Identifying waterbodies frequented by the elephants.
  - DNA profiling
  - Camera traps
  - Statistical modelling based on mark-recapture
- Till 2017 Direct and Indirect method only used and Scientific estimation is being used in this years' census.

Regional Elephant Population Decline and Threats		
Region	Declining % (Compared with 2017 Estimate)	Threats
Central Indian and Eastern Ghats	41 %	<ul style="list-style-type: none"> <li>• Unmitigated mining</li> <li>• Linear infrastructure construction</li> <li>• developmental projects</li> </ul>
Southern West Bengal, and	84%	
Jharkhand	68%	
Orissa	54%	
Western Ghats	About 18 %	<ul style="list-style-type: none"> <li>• Commercial plantations (coffee and tea)</li> <li>• Farmland fencing</li> <li>• Human encroachment</li> </ul>
Kerala -	Nearly 51% (2,900)	
Shivalik-Terai population in Uttarakhand and Uttar Pradesh	2%	<ul style="list-style-type: none"> <li>• Encroachments</li> <li>• Forest clearing</li> <li>• Monoculture</li> <li>• Invasive species</li> <li>• Intensified agriculture</li> <li>• Linear infrastructure</li> </ul>
North East	Data Not Available	<ul style="list-style-type: none"> <li>• Human habitations</li> <li>• Tea plantations</li> <li>• Mines, oil refineries</li> <li>• Linear infrastructure</li> </ul>

## What are the impacts of declining elephant population?

- **Human Animal Conflict** - Threats have pushed elephants to venture into historical but currently unoccupied areas fuelling human-elephant conflicts.
- **Retaliatory Killing** - In some cases, conflicts can escalate to retaliatory killings of elephants, further exacerbating their population decline.
- **Economic Losses** - Human-elephant conflicts can result in significant economic losses

for farmers and communities, especially in areas where agriculture is a primary livelihood.

- **Habitat Degradation** - As elephant populations decline, their role in shaping and maintaining ecosystems becomes compromised.

*Elephants are ecosystem engineers and keystone species influencing vegetation structure and seed dispersal.*

- **Disruption of Food Chains** - Their decline can disrupt food chains, affecting predator populations and overall ecosystem balance.
- **Reduced Seed Dispersal** - Elephants play a vital role in dispersing seeds, helping to regenerate forests and maintain plant diversity.
- **Loss of Cultural Heritage** - Elephants have deep cultural significance in India, and their decline represents a loss of cultural heritage.
- **Reduced Tourism Revenue** - Elephant tourism is a significant source of income in many parts of India.
- **Impact on Traditional Practices** - Some indigenous communities rely on elephants for their livelihoods and cultural practices.

### What are the elephant's conservation initiatives?

- **Area Conservation** - There are 33 elephant reserves in India aimed at conserving their population.
- **Project Elephant** - It was launched in 1992 to protect elephants, their habitat and corridors, address issues of man-animal conflict and welfare of captive elephants
- **Surveillance** - Monitoring of Illegal Killing of Elephant is launched in 10 elephant reserves since 2003.
- **Stop Poaching** - Anti-poaching units have been formed to patrol elephant habitats and apprehend poachers.
- **Prevent Wildlife Crime** - Special Elephant task forces have been set up to address specific threats to elephant populations, such as ivory smuggling.
- **Compensation** - Community compensation schemes are in place to reimburse farmers for crop damage caused by elephants.
- **Surveys** - Regular elephant surveys are conducted to assess elephant population trends and distribution.

### What are the strategies to conserve elephant population?

- Strengthening [elephant corridors](#) and connectivity, restoring habitat, mitigating developmental projects, and ensuring the support of local communities for elephant conservation.
- Focused estimation exercise to comprehensively assess occupancy and abundance to devise specific conservation actions.
- Develop early warning systems to alert communities of approaching elephant herds.
- Establish community-based anti-poaching units to monitor and protect elephant habitats.
