

Aspirational Districts Programme

Why in news?

\n\n

\n

- NITI Aayog has recently launched the baseline ranking for 115 aspirational districts.

\n

- This is in line with the Aspirational Districts Programme (ADP) announced earlier by the Prime Minister.

\n

\n\n

What is ADP?

\n\n

\n

- It aims to quickly and effectively transform some of India's most underdeveloped districts.

\n

- It will identify areas of immediate improvement, measure progress, and rank districts.

\n

- The broad ideas of the programme include -

\n

\n\n

\n

- i. **convergence** of central and state schemes

\n

- ii. **collaboration** of central, state level 'Prabhari' (in-charge) officers and district collectors

\n

- iii. **competition** among districts

\n

\n\n

\n

- The states are the main drivers in the programme.

- \n
- Deliberately, the districts have been described as aspirational rather than backward.
 - The motive is to view them as areas of opportunity and hope rather than of distress and hopelessness.
- \n

\n\n

How were the districts selected?

\n\n

- \n
- The 115 districts were chosen by senior officials of the Union government.
 - This was in consultation with State officials on the basis of a composite index.
 - The parameters included are -
- \n

\n\n

- \n
- i. deprivation enumerated under Socio-Economic Caste Census
 - ii. key health and education performance indicators
 - iii. state of basic infrastructure
- \n

\n\n

What is the present ranking on?

\n\n

- \n
- The present ranking is based on 49 indicators across 5 sectors.
 - These sectors are areas that have been targeted for transformation -
- \n

\n\n

- \n
1. health and nutrition
 2. education

- \n
3. agriculture and water resources
 - \n
 4. financial inclusion and skill development
 - \n
 5. basic infrastructure
 - \n

\n\n

- \n
- A minimum of one district was chosen from every State.
 - \n
 - Apparently, the largest concentration of districts is in the States which have historically under-performed.
 - \n
 - This includes states such as UP and Bihar, or which are afflicted by left-wing extremism such as Jharkhand and Chhattisgarh.
 - \n
 - The present ranking would be followed by delta ranking of these districts based on their "incremental progress".
 - \n

\n\n

How is progress monitored?

\n\n

- \n
- NITI Aayog in partnership with the government of Andhra Pradesh has created a dashboard.
 - \n
 - This is for monitoring the real-time progress of the districts.
 - \n
 - District collectors of all the aspirational districts can input the latest available data of their respective districts.
 - \n
 - The dashboard will also be open to the public.
 - \n

\n\n

What are the significant aspects of ADP?

\n\n

- \n
- **Approach** - This is the first time India's most backward districts are being

focussed.

\n

- ADP is a better vision of how public services are best delivered to those who need them the most.

\n

- **Governance** - Achieving success in this programme necessitates the contribution of all 3 tiers of government.

\n

- The role of states is important in terms of facilitating resource, personnel, etc.

\n

- On financial inclusion, the full cooperation of banks is necessary and only the Central government has leverage over them.

\n

- The most crucial is the role of District Magistrate or Collector.

\n

- As s/he is familiar with the challenges of his or her geography and has considerable power to implement government schemes.

\n

- **Competitive federalism** - The spirit of cooperation needs to be supplemented by a culture of competition.

\n

\n\n

\n

- ADP takes the principle of competitive federalism down to district administrations.

\n

- **Civil society** - ADP has opened its door to civil society and leveraged the tool of corporate social responsibility.

\n

- This will bring new ideas and fresh energy from non-government institutions, to join the “official” efforts.

\n

- **Efficiency** - Many schemes of the Centre have flexible spending components, permitting autonomy at local level.

\n

- But these are seldom used in practice due to controlling Central and State machineries.

\n

- Thus ADP focusses on not spending more but spending better.

\n

- There is no financial package or large allocation of funds in ADP.

\n

- It only aims at leveraging the already existing resources of several

government programmes, to use them more efficiently.

\n

- **Smart data** - Data collection is often delayed or lacking in quality in India, distorting the development policy efforts.

\n

- With real time data in ADP, those on the ground level can alter strategies after accurate feedback.

\n

- In a way, the ADP reorients how government does its business of delivering development.

\n\n

Quick Fact

\n\n

Prabhari Officer

\n\n

\n

- Each district has a prabhari (in-charge) officer -

\n

\n\n

\n

1. assigned from the Centre (of additional secretary or joint secretary rank)

\n

2. assigned from the State (of the rank of Secretary to State government)

\n

\n\n

\n

- A prabhari officer will work in cooperation with the district administration.
