

## Ayushman Bharat - Hospitals' Concern

## What is the issue?

 $n\n$ 

Hospitals are displeased with the provisions of the Ayushman Bharat programme. Click here to know more on the scheme

 $n\n$ 

## What are the concerns?

 $n\n$ 

\n

• **Rates** - Government recently published the rates that insurance companies would pay hospitals.

۱'n

- This applies for the 1,350 procedures covered under the scheme.
- Hospitals have criticised these rates as being arbitrary and low.
- E.g. the price of Caesarean section for 5 days of hospital stay, food and consultation is Rs.9,000
- Even government hospitals incur Rs.7,000 a day just to maintain a bed.
- **Rationale** The reimbursement rates were not calculated in a scientific manner.

\n

• Doctors are thus concerned about the clustering of medical conditions in the rate list.

۱'n

- $\bullet$  E.g. treatment for tuberculosis and HIV with complications will be reimbursed at the same rate of Rs.2,000 a day
- Clearly, the degree of treatments for HIV and tuberculosis differ.
- HIV complications can be relatively serious and these illnesses must be compensated differently in the scheme.

• **Hospitals** - Ayushman Bharat relied on a study of over 100 hospitals in 60 cities.

۱n

- $\bullet$  But these were mostly hospitals with under 50 beds in tier-2 and tier-3 cities.
- The cost structure of these hospitals is substantially different from tertiary-care hospitals in tier-1 cities.
- $\bullet$  But Ayushman Bharat rates do not account for these differences.  $\mbox{\ensuremath{\backslash}} n$

 $n\n$ 

## What is the government stand?

 $n\n$ 

\n

- For now, the government is committed to the launch date of August 15.
- ullet But officials have acknowledged that the rates will be revised.
- AHPI (Association for Healthcare Providers India) has been asked to submit a list of 100 key procedures.
- $\bullet$  Ayushman Bharat would then conduct a detailed cost study for this.  $\mbox{\ensuremath{\backslash}} n$
- $\bullet$  Until then, hospitals are asked to continue with the present rates.  $\mbox{\ensuremath{\backslash}} n$
