

## Ayushman Bharat Programme

### Why in news?

\n\n

The Government has announced two major initiatives in health sector, as part of newly announced Ayushman Bharat programme.

\n\n

### What are the provisions?

\n\n

\n

- The programme is aimed at making interventions to address health holistically, in primary, secondary and tertiary care systems.

\n

- The initiatives under the programme are:

\n

\n\n

\n

- i. Health and Wellness Centre

\n

- ii. National Health Protection Scheme

\n

\n\n

\n

- **Health and Wellness Centre** - National Health Policy, 2017 envisioned Health and Wellness Centres as the foundation of India's health system.

\n

- Under this, 1.5 lakh centres will bring health care system closer to the homes of people.

\n

- The centres will provide comprehensive health care, including for non-communicable diseases and maternal and child health services.

\n

- These will also provide free essential drugs and diagnostic services.

\n

- Contribution of private sector through CSR and philanthropic institutions in adopting these centres is also envisaged.  
\n
- **National Health Protection Scheme** - This will cover over 10 crore poor and vulnerable families.  
\n
- This would translate to around 50 crore beneficiaries.  
\n
- The scheme provides coverage of upto Rs. 5 lakh per family per year for secondary and tertiary care hospitalization.  
\n
- This is said to be the world's largest government funded health care programme.  
\n
- **Besides**, 24 new Government Medical Colleges and Hospitals will be set up, by up-grading existing district hospitals in the country.  
\n
- This would ensure that there is at least 1 Medical College for every 3 Parliamentary Constituencies.  
\n
- Also, at least 1 Government Medical College in each State of the country.  
\n
- This is to further enhance accessibility of quality medical education and health care.  
\n

\n\n

### **What is the significance?**

\n\n

- Lakhs of families, at present, borrow or sell assets to receive inpatient treatment.  
\n
- The concern of the consequent impoverishment of poor and vulnerable families is a continuing one.  
\n
- Under the existing Rashtriya Swasthya Bima Yojana (RSBY), poor families get an annual coverage of Rs. 30,000.  
\n
- Several State governments have implemented or supplemented health protection schemes that provide varying coverage.  
\n
- The present initiatives will supplement these in taking health care to a larger

mass.

\n

- Higher health insurance cover is also seen as leading to a higher life expectancy.

\n

- The scheme could potentially ensure enhanced productivity and well being, averting wage loss and impoverishment.
