

BRICS Summit - Johannesburg Declaration

\n\n

Why in news?

\n\n

The 10th summit of the BRICS grouping was held recently in Johannesburg, South Africa.

\n\n

What are the key outcomes?

\n\n

- \n
 - BRICS has produced a 102-paragraph-long Johannesburg Declaration, one of the longest in recent years.
- \n
 - **Trade** - BRICS framed its deliberations against U.S. President's unconventional approach on world affairs.
- \n
 - It made a special mention of the looming trade wars among major powers.
- \n
 - BRICS leaders thus stressed the centrality of the rules-based order.
- \n
 - It calls for a transparent, non-discriminatory, open and inclusive multilateral trading based on WTO.
- \n
 - Besides, the declaration discussed on the problem of international terrorism.
- \n
 - **Industrial Revolution** - BRICS leaders will soon commence the full operationalization of the BRICS Partnership on New Industrial Revolution (PartNIR).
- \n
 - PartNIR will deepen BRICS cooperation in digitalization, industrialization, innovation, inclusiveness and investment.
- \n
 - It aims to maximize the opportunities and address the challenges arising

from the 4th Industrial Revolution.

\n

- PartNIR should engage with the private sector and young innovators working at the cutting edge of technology.

\n

\n\n

\n

- **Development** - The leaders renewed their commitment to an inclusive and “people-centred approach” on development.

\n

\n\n

\n

- The need for a new strategy on employment, education and skill development was also articulated.

\n

- This especially gains significance as the digital revolution unfolds.

\n

\n\n

\n

- **Business** - BRICS Business Council has been actively enhancing trade and economic cooperation.

\n

- It covers diverse sectors ranging from manufacturing and energy to financial services and regional aviation.

\n

- **Africa** - The BRICS outreach to Africa that began at the summit in 2013 has picked up momentum now.

\n

- African leaders are in want of more big loans from the New Development Bank (NDB) for their infrastructure projects.

\n

- So far, the NDB has dispersed loans totalling \$5.1 billion, but all to its members only.

\n

- **BRICS Plus** - China introduced the “BRICS Plus” format at the Xiamen summit last year.

\n

- It involved inviting a few countries from different regions.

\n

- South Africa emulated it, with representation of five nations of its choice.

\n

- The countries were Argentina, Jamaica, Turkey, Indonesia and Egypt.

- \n
- An immediate benefit of BRICS Plus is the opportunities it provides for networking among leaders.
 - However, the precise role of “BRICS Plus” countries will take time to evolve.
 - **India** - Among the bilateral meetings that took place was also the interaction between Indian PM and Chinese President.
 - The interaction deepened the trend towards conciliation between Asia’s two biggest powers.
- \n

\n\n

What is the significance?

\n\n

- \n
- BRICS represents over 40% of the world’s population and accounts for 22% of global GDP.
 - It will thus continue to be an influential voice as long as its convergences prevail over its divergences.
 - Changing power equations within BRICS are being witnessed as a new development.
 - Evidently, China’s dominance is a reality even as BRICS asserts on sovereign equality of all members.
 - On the other hand, China-Russia proximity has been a continuing factor.
