

Bringing Fuel Prices under GST.

Why in news?

 $n\n$

Union government is planning to bring petrol and diesel under GST to check prices.

 $n\n$

What is the current taxation process for fuels?

 $n\n$

\n

- In the current structure, both the central and state governments levy a tax on petrol, diesel, crude, and natural gas.
- The Centre charges excise duty, while each state has its own Value Added Tax (VAT).
- \bullet Added to these are the dealer commissions, all of which inflates the price that consumers pay at the retail pumps. \n

 $n\n$

What are the advantages of bringing fuel prices under GST?

 $n\n$

۱n

• Bringing petroleum products under GST would mean a single rate (18% or 28%) in place of excise duty and state VAT, which will lower fuel prices at pumps.

\n

- \bullet Reduced fuel prices will lead to lower transport costs for industries who benefit from increased production and competitiveness. \n
- Idea of a 'single nation, single tax', will be implanted firmly which is aimed at improving production and employment while taxing consumption.
- Disadvantages caused to firms due to exclusion of fuel prices under GST will

be resolved and the firms can claim input tax credit. \n

 $n\$

What are the concerns with bringing fuel prices under GST?

 $n\n$

\n

- Since, petroleum products are huge revenue earners, the state and union government will be at a loss of revenue.
- \bullet Therefore, revenue considerations, will likely drive the decision on bringing petroleum products under GST. $\ensuremath{\backslash} n$
- \bullet The decision will be taken by the GST Council, in which states have a major say. $\ensuremath{\backslash} n$
- And if they agree to have petrol, diesel and other products under GST, they
 will still have the autonomy to levy an additional or top-up tax, which can
 vary across states.
- Even in this case, the union government would have to compensate states for any shortfall in revenues for five years.
- Thus, the governments must be well equipped to handle the consequences of bringing fuel prices under GST.
