

Brookings Poverty Report

Why in news?

\n\n

\n

- World Bank's Brookings Institute recently released a report titled 'The start of a new poverty narrative'.

\n

- The report has highlighted India's improvement in moving down in the global poverty ranking.

\n

\n\n

What is the case with India?

\n\n

\n

- India had just 73 million people in the poorest of the poor index as of May 2018.

\n

- This is a decrease from 125 million poor people found in 2016.

\n

- As many as 44 Indians are being taken out of poverty every minute, which is the highest in the world.

\n

- Importantly, the report says India is no more the country with most number of poorest people.

\n

- Nigeria has overtaken India with the largest number of extremely poor people at 87 million in early 2018.

\n

- India shot past China's 6.8% growth for the January-March quarter.

\n

- This has enabled the country to retain its position as the fastest-growing major economy.

\n

\n\n

\n

- If the positive growth pace continues, around 50 million more people will be out of poverty by 2022.

\n

\n\n

What is the trend in Africa?

\n\n

\n

- While poverty in India continues to fall, Nigeria is seeing a continuous uptick.
- Six people are being added every minute in the poor category in Nigeria.
- By 2018 end, in Africa as a whole, about 3.2 million more people may be in extreme poverty than there is today.
- If the trend continues, the African continent would account for nine-tenths of the world's extremely poor from two-thirds today.
- Shockingly, 14 out of 18 African nations are seeing a rise in extreme poverty.
- Democratic Republic of Congo could soon take over the number 2 spot as India continues to achieve high economic growth.

\n

\n\n

What is the global scenario?

\n\n

\n

- Sustainable Development Goals aims to end poverty by 2030.
- However, the world is far behind in achieving this target.
- Between 2016 beginning and July 2018, the world has seen about 83 million people escape extreme poverty.
- But it should have been about 120 million, if extreme poverty were to fall to zero by 2030.
- To get rid of this backlog of some 35 million people, countries now have to rapidly step up the pace.
