

Care Ecosystem

Why in news?

Recently, the need for addressing low female labour force participation rate (LFPR) through care economy has been highlighted.

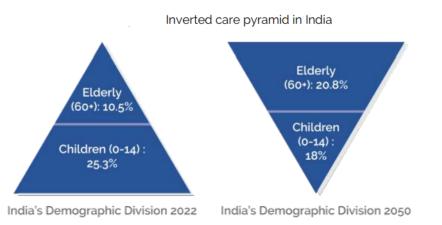

What is Care Ecosystem?

- **Care economy** It comprises of care work<u>, *both paid and unpaid*</u>, and direct and indirect care, provided within and outside the household.
- **Direct Care** These are personal, and relational care activities, such as feeding a baby.
- Indirect care It include activities like cooking and cleaning.
- **Unpaid care** These are caring work without monetary compensation.
 - For example, nursing an ill partner or cooking for a family member.
- ${\bf Paid\ care}$ It includes those works for exchange of some form of remuneration.
 - $\,\circ\,$ For example, services offered by domestic workers.
- Care workers are hired directly by families or through placement agencies, nursing bureaus, hospitals, home healthcare companies, and not-for-profit organisations, among others.

Why care economy is important?

- **Protecting depending population** It helps in addressing the demand for childcare and care for the elderly increasing in all regions.
- Addressing demographic change India's demographic landscape is expected to change between 2020 to 2050, necessitating more elderly care.

- **Facilitating for demand** The demand for external support in the form of hired caregivers is rising in urban and peri-urban areas.
- **Meeting changing societal structure** As India's economy undergoes rapid transformation, our society is also increasingly urbanizing and nuclearizing at an unprecedented rate.
- People are moving from villages to cities and the joint family structure is being replaced by smaller nuclear entities.
- **Higher economic potential** Investments in establishing care infrastructure and care services can unlock economic potential for India's economy
- It can create new business opportunities and can generate jobs, especially for women.

What is the status of Indian women in care economy?

- Healthy development of the care economy in India is necessary to support the primary caregivers in our society.
- Women are primary caregivers across the life course of household members.
- Women in care economy As of 2022, <u>36.5% of females were employed as unpaid</u> <u>family</u> workers as related to 9.3% of males.
- 37.5% of FLFPR comprises of women who are not paid for the work they do, which is separate from domestic work.
- The difference between female and male unpaid family labour employment is higher in rural areas than in rban areas.
- Women aged 15-64 years <u>spend about three times more time daily</u> than men in unpaid domestic work.
- Economic value of women's unpaid domestic and care work in India ranges between <u>15% 17% of GDP.</u>
- For women to participate in the economy, their care responsibilities need to shift elsewhere.
- **Challenges** There are <u>no standardised processes</u> and it <u>lacks minimum wages</u>, <u>employment standards</u>, safety and security measures, and quality standards for care by hired workers.
- Steps to offload women's care responsibilities
 - Reduce unpaid family labour employment
 - $\circ\,$ Relief from unpaid domestic work
 - $\circ\,$ Reduce Domestic Care Burden

Female Labour Force Participation

• **LFPR** - Labour Force Participation Rate denotes the percentage of persons in labour force (i.e. working or seeking or available for work) in the population.

• It consists of both employed and unemployed individuals, but not those who are inactive (due to education, discouragement, caring duties, retirement, disability, etc.)

• **FLFPR** – It is the *percentage of women aged 15 and older* who are economically active.

• It indicates how many women are part of the labour force

• **FLFPR in India** - According to the Economic Survey 2023-24, the FLFPR in India was <u>37% (2022-23)</u> against a world average of 47.8% (2022).

• **Recent trends** - FLFPR increased from 23.3% in 2017-18 to 37% in 2022 and there is *upward trend* of female LFPR from 24.6% in 2018 to <u>36.6% in 2022 in rural India</u>.

What are the measures taken in India?

- **Anganwadi network** Some State governments have focused on building support services through the existing Anganwadi network.
- **Increased budget allocation** In the 2024-25 Budget, there has been a <u>3% increase</u> in the Ministry of Women and Child Development's budget for the integrated childcare and nutrition programme (Saksham Anganwadi and Poshan 2.0 scheme).
- **Community based Crèches** Crèches for children are operational with partnership between government and non-government bodies.
- **Skilling and certification** Various apex bodies are involved in the skilling and certification of different cadres of care workers.
 - Home Management and Care Givers Sector Skill Council (earlier Domestic Workers Sector Skill)
 - Healthcare Sector Skill Council
 - $\circ\,$ National Skill Development Corporation
- International coordination The ILO Resolution on Decent Work and the Care Economy was adopted by the International Labour Conference during its 112th Session, in June 2024.
 - <u>G20 Bali Care Economy Dialogue</u>, have provided comprehensive recommendations to governments.
- **Delhi Declaration** It was prepared under India's leadership of G20 in 2023 that calls upon the G20 countries to
 - \circ $\underline{\textit{Promote investment}}$ in the availability and accessibility of social protection, and to affordable care infrastructure
 - <u>Address the unequal distribution</u> in paid and unpaid care and domestic work
 - \circ <code>Promote the continued participation of women</code> in education and employment

What lies ahead?

- Formulate a comprehensive policy to define the care ecosystem from a life course perspective.
- Review the existing models of Community based Creches for replicability, financial sustainability, and scalability.
- Develop a more widespread network of creches suitable to the local context and populace is required in rural, tribal, and urban areas to facilitate the participation of women in the workforce.

- Developing a needs-based assessment of the mix of care services required across age groups, socio-economic status, and geographies.
- Address the gap in the training, skilling, and certification of a mix of care workers.
- Map supply-side actors and institutions including the public, private, and non-profit sectors.
