

Child Rights and Environment

Why in news?

For the first time, the United Nations has recognised and affirmed children's rights to a clean, healthy and sustainable environment in a new guidance on children's rights and the environment.

What is UN guidance on children's rights and environment?

- The UN guidance, formally known as *General Comment No. 26*, was adopted in 2023.
- It provides a legal framework to address the adverse effects of environmental degradation and climate change on the enjoyment of children's rights.
- It is to ensure a clean, healthy, and sustainable world now and to preserve it for future generation
- It encompasses their rights to information and participation.
- It allows access to justice to protect and receive remedies for the harms caused by environmental degradation and climate change.
- It details member states' obligations under the *Child Rights Convention (UNCRC)* to address environmental harms and guarantee that children are able to exercise their rights.

What about the UNCRC?

- United Nations Convention on the Rights of the Child (UNCRC) was approved by the United Nation General Assembly (UNGA) in **1989**.
- It outlined *children's rights*, which include the right to life, health, clean drinking water and survival and development.
- It has been *ratified by 196 countries* including *India*.

UN Convention on the Rights of the Child

Right to Survival -to life, health, nutrition, name, nationality Nondiscrimination Right to Development – to education, care, leisure, Right to life, recreation, cultural survival and development activities Right to Protection - from Best interests of exploitation, abuse, the child neglect Respect for the child's views Right to Participation - to expression, information, thought, religion

What are the impacts of climate change on children?

- Children, including adolescents under the age of 18, are often more vulnerable than the general population to the health impacts of climate change.
- **Displacement of children** According to UNICEF report, extreme weather reports around the world lead to 12 million displacements of children in 2022.
- **Increases child mortality** According to a study, Heat-related child mortality due to high emissions is projected to double in the continent by 2049, compared with 2005–2014.
- **Separation from family** Climate change induced migration makes children highly vulnerable as they may get separated from their families or caregivers.
- Increases child labour Climate change related industries like agriculture and mining contribute to child labour which can expose children to exploitation and violence.
- Accelerates hidden hunger Infants will bear the increased burden of malnutrition as the temperature increases.
- Increases disease Burden Children will suffer more from the rise of infectious diseases.
- Less focus on human development Climate affected children are denied access to education and healthcare.

What is the relationship between extreme weather events and child marriage?

- Extreme weather events intensifies elements of structural oppression such as *gender* inequality and poverty.
- Gender-based violence and inequities have adverse impacts on girls' resilience leading to higher incidences of child, early and forced marriages (CEFM) in low and middleincome countries.

- **Reasons for child marriages** It is often seen as a coping strategy to reduce *economic vulnerability and food insecurity.*
 - In Bangladesh, daughters were married early after *Cyclone Aila* in 2009.
- Parents resorted to child marriages to protect daughters from sexual violence and avoid family dishonour.
 - Rates of sexual assault often escalate during times of crisis, particularly in evacuation camps or temporary shelters.
- Linkage with bride price/dowry Girls in sub-Saharan Africa or Vietnam have a local custom of bride price which had increased probability of CEFM during extreme events.
- But, in regions where <u>dowry is common such as India</u>, <u>girls were less likely to get married</u> during a drought year, because the bride's family could not afford dowry payment.

<u>Bride price</u> is the material or money entitlement that the groom's family is paying to the bride's family during marriage.

<u>Dowry</u> is the material or money entitlement that the bride's family is paying to the groom's family during marriage.

- Other findings- <u>Education and financial control</u> are key to empowering women and girls and allowing them to take their own decisions.
- <u>Educational attainment and CEFM were inversely associated</u> for girls in India and Malawi.
- Also, the incidence of *CEFM decreased as parental education increased* was observed in India and Vietnam.

Status of Child Marriages

- **Global level** Every year, <u>12 million girls get married</u> before adulthood.
- COVID-19 as well as poverty have spurred child marriages in India.
- The <u>Global Slavery Index 2023</u> has said that climate change, along with other environmental factors, has exacerbated modern slavery in Africa.
- More than 3.1 million Africans are in forced marriage and more than 3.8 million in forced labour.
- **India** In the last five years, it declined to 23.3% in 2020-21, according to the latest National Family Health Survey-5 data.
- Among the bigger States, West Bengal and Bihar have the highest prevalence of girl child marriage.

International Conventions that address Child Marriage

- The Convention on the Elimination of All Forms of Discrimination against Women covers the rights to protection from child marriage in Article 16.
- The Convention on Consent to Marriage, Minimum Age for Marriage and Registration of Marriages

- The African Charter on the Rights and Welfare of the Child
- The Protocol to the African Charter on Human and People's Rights on the Rights of Women in Africa.
