

Concerns with Over-Regulation

What is the issue?

\n\n

Commercial decisions in the country are routinely subjected to over-regulation, warranting the need for greater play of market forces.

\n\n

What is the airlines case?

\n\n

\n

- The two airlines, IndiGo and Spice Jet, recently decided to charge a fee for their online check-in service.

\n

- The decision was made to make up for higher costs that the airlines were facing.

\n

- But the protests from flyers prompted the civil aviation ministry to review the decision to see whether it falls within the regulated pricing framework.

\n

- This has made IndiGo to tweak its decision and say passengers doing web check-in will not have to pay for all the seats.

\n

- This is unfortunate as charging for a preferred seat while doing online check-in is a usual practice followed by many airlines globally.

\n

- Also, there is no legislation that bars airlines from charging a fee for specialised services.

\n

- Yet, the ministry issued a review notice for such a decision.

\n

\n\n

What is the ATM industry case?

\n\n

\n

- The RBI had mandated a minimum net worth of Rs 100 crore for service providers and their sub-contractors handling cash management logistics on behalf of banks. Click [here](#) to know more
 \n
- It also directed that cash vans transporting money must have CCTVs, GPS connectivity, tubeless tyres, hooters and wireless communication systems.
 \n
- Implementing the new guidelines will lead to additional costs.
 \n
- Hence, the Confederation of ATM Industry (CATMi) warned that almost half the installed ATMs could be closed down by the end of the current financial year because of onerous regulatory requirements.
 \n
- This is because both the ATM industry and the banks are not willing to pass on the additional costs to consumers.
 \n

\n\n

What should have been done?

\n\n

- **Airlines case** - The amount that an airline charge for web check-in is a decision best left to the markets.
 \n
- Competing airlines should be allowed to figure out what works for them and what doesn't.
 \n
- Hence, policymakers should not interfere in the functioning of the everyday markets.
 \n
- **ATM case** - The parties concerned should have reached out to the RBI, demanding either a relaxation in compliance norms or an extension of the deadline.
 \n
- Also, if a service is being provided, the customer must bear the cost.
 \n
- Thus the ease provided by web check-ins and ATM is a convenience for which customers should be willing to pay.
