

Concerns with Sagarmala project

Why in news?

\n\n

The government has approved creating 14 coastal economic zones (CEZs) in JNPT, Maharashtra under Sagarmala Project.

\n\n

What is the Sagarmala project?

\n\n

\n

- Sagarmala project is a strategic and customer-oriented Rs 8,000,000 million investment initiative.

\n

- It aims to modernize India's Ports so that port-led development can be augmented and coastlines can be developed to contribute in India's growth.

\n

- It also aims for transforming the existing Ports into modern world class Ports and integrate the development of the Ports and efficient evacuation systems.

\n

- Development of mines, industrial corridors, rail, road and airport linkages with these water ports are also part of the project.

\n

\n\n

What is the recent announcement about?

\n\n

\n

- The Jawaharlal Nehru Port Trust in Maharashtra has approved for the creation of 14 CEZs.

\n

- Reports suggest that 45 companies from the telecom, technology, and automobile industries are expected to bid for them.

\n

- Since the JNPT accounts for 40% of India's trade, the zone expects to attract investment worth Rs 15,000 crore and create 1,50,000 jobs in the first phase.

\n

\n\n

What is the lesson from SEZs?

\n\n

\n

- The SEZ policy appeared to have largely been a success as evident from accounting for a third of the country's exports.

\n

- However, it is to be noted that much of this was on account of the IT and ITeS sectors which merely shifted location when the sunset clause on their sector-specific tax breaks kicked in.

\n

- The enthusiasm for SEZs waned considerably once the government imposed the minimum alternate tax and the dividend distribution tax.

\n

- It is thus difficult to gauge the real performance of SEZs, and they highlight the risk of creating islands of “Doing business”.

\n

\n\n

\n

- The model’s excellence is less likely to generate the kind of all-round economic development that India urgently needs.

\n

- Also, political and social dynamics differ significantly making this Chinese developmental model a least optimum solution for India.

\n

\n\n

Is CEZ model effective for Sagarmala?

\n\n

\n

- Sagarmala project which is based on CEZ seems to have become a casualty of the chronic problem of land acquisition.

\n

- For Sagarmala project, the land requirement could extend from 300 km to 500 km adjacent to deep-water ports.

\n

- Reports suggest that several projects have hit roadblocks either on account of high prices or limited land availability.

\n

- Investors are very cautious of investing in CEZs because they do not attract the provisions of “Eminent domain”.
- This provides for some 13 exceptions such as railways and coal-bearing tracts from the requirement of prior consent.
- In all, the feasibility of these economic models for infrastructure projects is uncertain without tax concessions and relaxations in labour laws that investor community expects.

\n\n

Quick Facts

\n\n

SEZ

\n\n

- Special economic zone (SEZ) refers to designated areas with special economic regulations that differ from other areas.
- These regulations are especially conducive to foreign direct investment.
- A company doing business in an SEZ usually receives tax incentives and the opportunity to pay lower tariffs.

\n\n

CEZ

\n\n

- Similar to SEZ, the CEZ focuses on coastal development.
- CEZs are aimed at promoting development of port-proximate industrial clusters, encouraging port-led development, reduction of logistics cost and time for movement goods.
