Digital Health Incentive Scheme

Why in news?

The central government has recently given a year-long extension to the Digital Health Incentive Scheme (DHIS).

What is Digital Health Incentive Scheme?

- **Launch** - The scheme was launched by the National Health Authority (NHA) in **2023**.

National Health Authority is the successor of the National Health Agency which was constituted in 2019 and has a full functional autonomy. It is the apex body responsible for implementing AB-PMJAY and National Digital Health Mission.

- **Aim** - It is meant for digitising patients' health records and linking them with the Ayushman Bharat Digital Health Account (ABHA ID).
- It also aims to promote digital health transactions and to provide a boost to the healthcare providers for adopting digital health.

ABHA ID is a unique identity for people just like an Aadhaar ID that allows one to store and share their medical records digitally which includes records such as doctor's prescriptions, diagnostic test results.

- **Eligibility** - All Health facilities like Clinics, Nursing Homes & Hospitals.
- Laboratory/Radiology diagnostics Centers and Pharmacies.
- Entities providing ABDM enabled digital solutions (Digital Solution Companies).

Public digital solution companies includes companies such as National Informatics Centre (NIC) and Centre for Development of Advanced Computing (C-DAC), which provide eHospital and eSushrut solutions to government hospitals.

- **Beneficiaries** - The Tier 1 and 2 cities in India have been the main beneficiaries of

digital healthcare services.

- The scheme is applicable to both *public and private hospitals and digital solution companies* (DSCs) creating digital health records.

Ayushman Bharat Digital Mission

AYUSHMAN BHARAT DIGITAL MISSION

Swasthya Sewaon Ko Mili Digital Udaan

"Ayushman Bharat Digital Mission is ensuring that every patient gets timely and quality healthcare with minimum hassle."
– Narendra Modi, Prime Minister

Health Records Anytime Anywhere
Store your health records digitally so that you can access and share as required

Easy Access
Get easy access to services from registered healthcare providers

Paperless Process
Get your medical information like lab reports, doctor prescriptions etc. digitally

Teleconsultation Facility
Avail teleconsultation from verified healthcare professionals

Freedom From Queues
Book online appointments and get queue-less OPD visit facility

ABDM so far

24 crore + ABHA number holders

7.5 lakh ABHA app users

1.5 lakh Health Facilities

65 thousand Healthcare Professionals

CBC 171801500052223

- **Incentives** – Under the scheme, government and private hospitals, clinics, nursing homes, diagnostic labs, and pharmacies are *paid Rs 20 for each additional record* they digitise, over and above the threshold of 100 transactions a month.
- Under it, each facility or digital solution company can *earn incentives up to Rs 4 crores*.

Digital Health Incentive Scheme Incentives

Type of Entity	Base Level Criteria	Incentives
Digital Solution Companies	For hospitals/clinics /labs /nursing homes using their software	5 rupees per transaction per month
Hospitals/Clinics/Nursing homes	100 transactions per month	20 rupees per additional transaction above the base level.
Diagnostic Facilities/Labs	100 transactions per month	20 rupees per additional transaction above the base level.
	For health locker/teleconsultation transactions	500 rupees transactions per month, 5 rupees per additional transaction above the base level.
Insurance Provider	For every insurance claim transaction linked with ABHA address filled by hospital through Health Claim Exchange	500 rupees per claim or 10 percent of the claim amount, whichever is lower.

Why DHIS is extended?

- **Extension** - DHIS will now remain in effect ***till June 30, 2025.***
- **Need for extension** - It is meant to incentivise providers of digital health solutions such as hospital's health management information system (HMIS) and laboratory management information system (LMIS) to make available the right software at an affordable cost.
- **Impact on hospitals** - The scheme *helps reimburse hospitals their expenditure on digitising* their facility as this expenditure was often reported as a significant drawback for hospitals to move to digital health.
- Hospitals and clinics *have to install computers and laptops*, purchase an internet connection, and *software (HMIS/LMIS)* to go digital.
- A *behaviour change component* is also involved in moving from physical mode of working to digital.
- The scheme is on the lines of the incentives given for *promotion of UPI.*
- **Significance** - This extension will *help health facilities* adopt the essential digital tools they need for their operations.

How DHIS can be beneficial for the patients?

Benefits of Digital Health Incentive Scheme

 <p>Earn incentives for Digitization</p> <p>Reimburse the expenses incurred for digitization to all the participating healthcare facilities, Digital Solution Companies</p>	 <p>Efficiency in Healthcare Delivery</p> <p>Seamless access to patient's longitudinal health records; Removes hassles in the healthcare process (registration, appointment, consultation, IPD admission, discharge, etc)</p>	 <p>Building a Robust Digital Health Ecosystem</p> <p>Building a robust digital health ecosystem across different levels of healthcare facilities</p>	 <p>Improved Quality of Care</p> <p>Evidence based, accessible, and good quality care. Patient's ease of access to digitized health records and improved healthcare delivery.</p>
---	---	---	---

- **Better services** - DHIS equips the care providers to become digital, thereby enabling better healthcare services and more convenience for patients.
- **Reduced waiting time** - By enabling digital transactions the patient's waiting time gets reduced. Patients will be able to scan a QR code and avail quick OPD registrations.
- **Access of medical records** - They can also securely view, access, and share their health records with the care providers.
- **Reduced burden on patient** - Without the scheme, hospitals are likely to recover the digitisation costs from the patients.
- **Saving money** - Patients are less likely to get same tests done repeatedly due to loss of records, especially in cases of migrant workers and patients travelling from one state to another.
- **Health insurance** - This provides access to better health insurance for older people.
