

## **Draft National Forest Policy 2018**

## Why in news?

 $n\n$ 

Ministry of Environment, Forest and Climate Change (MoEFCC) recently released the draft National Forest Policy 2018.

 $n\n$ 

## What are the highlights?

 $n\n$ 

\n

• **Objective** - The draft forest policy, 2018 will be an overarching policy for forest management.

۱n

• It aims at bringing a minimum of one-third of India's total geographical area under forest or tree cover.

۱n

• It seems to address the concern of decline in forest productivity.

• **Concepts** - The draft has introduced some new concepts such as:

 $n\$ 

\n

i. economic valuation of ecosystem services

ii. forest certification

۱n

iii. national forest ecosystem management information system  $\n$ 

 $n\n$ 

\n

• **Approach** - The 1988 forest policy had a local community- and ecology-centric approach.

\n

• From this, the new draft shifts the focus to timber and forest-based

industries.

\n

- It identifies " $\underline{production\ forestry}$ " and plantations as the new thrust area.
- **Tribal to Timber** The importance offered to the rights of local, forest-dependent communities are being diluted.
- $\bullet$  It is substituted by the <u>demand for raw material</u> from forest-based industries.  $\mbox{\ensuremath{\mbox{\sc h}}}$
- The draft aims to use degraded land available with forest corporations to produce "quality timber".
- This goes against the emphasis on "fuelwood and fodder development" as in 1988 policy.

\n

• **Production forestry** - The 1988 policy had sections called 'Rights and Concessions' and 'Tribal People and Forests'.

\n

- $\bullet$  These are replaced by ideas of 'Production Forestry', increasing the productivity of forest plantations and facilitating forest industry interface. \n
- **Industry** The draft stresses the need to stimulate growth in the <u>forest</u> <u>based industry sector</u>.

۱n

• It encourages forest corporations and industrial units to step up growing of <u>industrial plantations</u>.

\n

 Livelihood - The current draft mentions about the livelihoods of local communities -

\n

 $n\n$ 

\n

- $\ensuremath{\mathrm{i.}}$  as  $\underline{\text{passive recipients}}$  of benefits accruing from wildlife tourism
- $\ensuremath{\text{ii.}}$  as  $\underline{\text{labour}}$  for forest-based industries

\n

iii. in relation to non-timber forest produce (NTFP)

 $n\$ 

۱'n

• **PPP** - The draft proposes a public-private partnership model for <u>afforestation</u> and <u>reforestation</u> activities.

\n

- This will be in "degraded forest areas and forest areas available with Forest Development Corporations and outside forests".
- Plantation choice The draft recommends 'commercially important species' like poplar and eucalyptus.
- Both of these are non-indigenous plantation species.
- **Protection measures** The policy proposes to <u>restrict schemes and projects</u> which interfere with forests that cover steep slopes.
- Catchments of rivers, lakes, and reservoirs, geologically unstable terrain and such other ecologically sensitive areas are also covered.
- The ecologically sensitive catchment areas shall be stabilized with suitable soil and water conservation measures.
- Planting suitable trees and grass like bamboo in these areas is also suggested.
- **Mechanism** It suggests setting up of <u>two national-level bodies</u> for better management of the country's forests.
- These are the National Community Forest Management (CFM) Mission and the National Board of Forestry (NBF).  $\$
- $\bullet$  NBF will have to be headed by the central minister in charge of forests.
- The <u>state boards of forestry</u> will have to ensure inter-sectoral convergence, simplification of procedures, conflict resolution, etc.
- $\bullet$  The state boards of forestry will have to be headed by state ministers in charge of forests.  $\mbox{\sc h}$
- Besides, efforts will be made to achieve <u>harmonization between policies and laws</u> like Forest Rights Act (FRA) 2006.
- Community participation Efforts to ensure synergy between gram sabha & JFMC (Joint Forest Management Committee) will be taken up.
- $\bullet$  This is for ensuring successful community participation in forest management.  $\mbox{\sc h}$
- The CFM mission will address participatory forest management.

\n

- $\bullet$   ${\bf Financing}$  The  ${\bf compensatory}$  afforestation fund which is being transferred to the states will provide for management of forests.
- It will source afforestation and rehabilitation works in degraded forest areas and for bringing new areas under forest and tree cover.
- $\bullet$  Efforts for tapping <u>funds from other national sectors</u> will be taken up.  $\n$
- This may include rural development, tribal affairs, national highways, railways, coal, mines, power, etc.
- Forest fire The draft policy includes measures to safeguard ecosystems from forest fires, which include:  $\label{eq:constraint} \verb|\| n$

 $n\n$ 

\n

i. mapping the vulnerable areas

 ${\it iii.}$  remote sensing technology to control fire

۱n

iv. improved community participation  $\n$ 

 $n\n$ 

\n

• **Climate change** - Forests are natural <u>carbon sinks</u>, assisting in climate change mitigation.

\n

- $\bullet$  Climate change concerns will be factored in all forest and wildlife areas working/management plans and Community Ecosystem Management Plans. \n
- Wildlife rich areas and corridors outside protected areas would be identified and maintained for ensuring ecological and genetic continuity.
- **Human-wildlife conflict** Quick response, dedicated teams of well equipped and trained personnel would be developed.
- Health and veterinary services, rescue centres, speedy assessment of damage and quick payment of relief to the victims are other short term actions.

\n

 $\bullet$  Monitoring and management of population of wildlife would be adopted as part of long-term measures.  $\ensuremath{\backslash} n$
