

## **Ease of doing business in India**

### **Why in news?**

\n\n

\n

- “NITI-IDFC Report” on the ‘Ease of Doing Business’ in India was recently published.

\n

- This is a timely endeavour to assess the impact of the government initiatives at the ground level.

\n

\n\n

### **What is the background?**

\n\n

\n

- Government has carried out a series of regulatory reforms to create a favourable investment climate.

\n

- Various compliances mandated under the Companies Act have been done away.

\n

- Commercial courts were setup under the commercial Appellate Divisions Act of 2015, to resolve commercial disputes in a time-bound manner.

\n

- Insolvency and Bankruptcy Code (IBC) - 2016 was introduced to global quicken insolvency cases and address the NPA problem.

\n

- FDI liberalisation has taken place in the defence, pharmaceuticals and in airport management.

\n

\n\n

### **What does the report state?**

\n\n

\n

- The criterion adopted for determining the ease of doing business is the efficacy of these reforms.  
\n
- The “NITI-IDFC Report” studies this based on an enterprise survey of 3,500 manufacturing firms across Indian.  
\n
- **Single window clearance:** This system was introduced under “Make in India” initiative in 2014.  
\n
- It involves routing of all approvals required by an enterprise to set up a business through a hassle free common application window.  
\n
- Only 20% of the enterprises surveyed were found to have used this, which suggests either lack of awareness on the part of enterprises or ineffective implementation.  
\n
- **Access to finance:** Most enterprises rely on borrowings from banks and financial institutions as sources for finance.  
\n
- 61% of the enterprises surveyed reported that access to finance has either remained the same or worsened over the last year.  
\n
- **Clearance Time:** The survey finds that the average time taken to set up a business in India is 118 days, varying widely across states from 63 days in Tamil Nadu to 248 days in Assam.  
\n
- On an average, the time incurred for land allotment is 156 days and for getting a construction permit it is 112 days.  
\n
- The average number of days for completing labour-related compliances is 74 and for renewal of such compliances it is 62.  
\n
- **Dispute resolution:** The survey showed that the time taken for dispute resolution by enterprises varied across states, from less than one year to 13 years.  
\n
- For pending legal disputes, the enterprises surveyed reported an average duration of four years once the matter is taken to court.  
\n
- **Sector Specifics** - Start-ups & younger enterprises are found to have taken lesser time than older ones.  
\n
- Furthermore, labour-intensive industries were found to face major

challenges than capital-intensive industries.

\n

\n\n

## **Where are the areas that need improvement?**

\n\n

\n

- The reforms and their impact were pronounced in big cities but not clearly noticeable in smaller cities & rural areas.

\n

- The government needs to work for effective implementation of the reforms introduced across all states uniformly.

\n

- Creating awareness of the reforms introduced is needed to enable the enterprises to avail these benefits.

\n

- Labour compliances need to be further eased.

\n

- In this context, the proposed Model Shops and Establishments (Regulation of Employment and Conditions of Service) Bill, 2016 is a step in the right direction.

\n

\n\n

## **How does the future look?**

\n\n

\n

- While the report does raise some questions about the efficacy of the reforms carried out, it is a fact that the government focused and is heading in the right direction.

\n

- The results may not yet be clearly visible, but there is a greater amount of positivity about India among investors.

\n

- It can be safely assumed that the coming years would witness faster growth with a lower compliance burden on corporates.
