

## **Economic Colonisation via OBOR**

### **What is the issue?**

\n\n

China's emerging economic might, in the form of One Belt One Road Initiative may in future lead to economic colonisation.

\n\n

### **What is One Belt One Road Initiative (OBOR)?**

\n\n

\n

- OBOR is a development strategy proposed by Chinese President Xi Jinping in 2013.

\n

- It focuses on connectivity and cooperation between Eurasian countries, primarily the People's Republic of China, the land-based "Silk Road Economic Belt" (SREB) and the oceangoing "Maritime Silk Road" (MSR).

\n

- OBOR covers over 60 countries that form almost 30 per cent of world GDP and 60 per cent of the world's population.

\n

\n\n

### **What is India's stand on OBOR?**

\n\n

\n

- India perceives OBOR as a geopolitical architecture aimed at expanding Chinese influence in and around the region.

\n

- OBOR intent to create an infrastructure which would allow physical movement of goods, more specifically Chinese goods, to large parts of Asia and Europe including Russia.

\n

- OBOR has the potential to create a debt trap in most of the countries which comes under the ambit of OBOR.

\n

\n\n

## **Why China wants to pursue the OBOR initiative?**

\n\n

- \n
  - According to the World Bank, the growth of overseas development assistance (ODA) is slowing down globally.
  - \n
    - Multilateral development banks merely support 10 per cent of the developing world's infra spending.
    - \n
      - China is trying to make use of this opportunity to fulfil its expansionist tactics.
      - \n

\n\n

## **How Chinese investments might lead to debt trap?**

\n\n

- \n
  - The pattern of growing investments by China would increase the external debt of the OBOR economies towards China.
  - \n
    - An analysis of the Asian economies shows the average reserves to external debt as on 2015 stands at 53.3%.
    - \n
      - These debts levels are bound to increase as they get more intertwined with OBOR plans.
      - \n
        - e.g Sri Lanka's estimated national debt as per IMF stands at \$44 billion in 2015, of which around 15% is owed to China.
        - \n
          - Recently, for the Hambantota port project, Sri Lanka was coerced to borrow more funds from China in higher interest rate.
          - \n

\n\n

## **What are the implications?**

\n\n

- \n
  - The OBOR initiative may affect the domestic production capabilities and make the participants heavily depended upon Chinese imports.

\n

- The inability to repay the debt, could lead the Chinese acquiring equity possession of these large tracts of infrastructure projects and thereby making inroads into the geographic space.

\n

- Another implication could also be the spreading the use of Yuan as an alternate currency to the dollar.
