

EC's Meeting with Political Parties

What is the issue?

 $n\n$

\n

• The Election Commission (EC) recently held its meeting with all major political parties.

\n

• The meeting is aimed at making the electoral process more transparent, inclusive and credible.

\n

 $n\$

What are the major demands?

 $n\n$

\n

- ullet Several state Assembly elections and the general election are approaching.
- In this context, there were three major demands:

 $n\n$

\n

1. giving up on electronic voting machines (EVMs) and moving back to paper ballots

\n

- 2. linking voter identification cards to Aadhaar \n
- 3. cap on election expenditure of political parties (click here to know more)
 \n

 $n\n$

What is the tussle with EVMs?

 $n\n$

\n

• Most of the parties flagged the issue of malfunctioning of electronic voting machines (EVMs).

\n

- EVMs have typically been questioned by parties after losing elections.
- However, it is claimed that EVMs are tamper-proof.
- It also eliminates booth capturing, a favourite pastime of political parties during elections.

\n

• This is because the machines do not allow casting of more than five votes a minute.

\n

- \bullet The provision of voter-verifiable paper audit trail (VVPAT) machines has further enhanced EVMs' credibility.
- \bullet Besides, a return to the ballot paper system would also not be advisable.
- As, it would come with huge environmental costs and logistical issues.

 $n\n$

What is the Aadhaar linkage demand?

 $n\n$

\n

• The demand for linking Aadhaar to voter ID cards is prompted by concerns about the existence of ghost voters.

\n

• E.g. the Congress has complained about 6 million fake voters in the electoral rolls of Madhya Pradesh.

\n

- \bullet It is true that Aadhaar would go a long way in eliminating these fake voters. $\mbox{\ensuremath{\backslash}} n$
- But notably, Aadhaar itself is not a proof of citizenship.
- \bullet Moreover, there are privacy concerns related to Aadhaar. $\ensuremath{\backslash n}$
- \bullet So mandating it as the final adjudicator for voting rights is questionable. $\ensuremath{\backslash} n$
