

Education Survey in Indian

What is the issue?

 $n\n$

\n

- Young Lives recently released a survey on the education sector.

 $n\n$

What does the survey say?

 $n\n$

۱n

• **Data** - 91% of 15-year-olds were enrolled in secondary schools in 2016 as against 78% in 2009.

\n

• The increase in enrolment was particularly significant for backward class girls - 90% from 74%.

١'n

• The number of children attending private schools too increased marginally to 37% the 2008 figures.

۱n

 Private school enrolment remained biased towards - boys, upper castes, the wealthy and urban children.

\n

• Other findings - Although more children were found to be in schools, learning outcomes weren't encouraging.

\n

- Sarva Shiksha Abhiyan's work in ensuring better access to schools in rural areas was found to have an immense impact.
- A large gap was also noticed in learning outcomes of disadvantaged children & the wealthier with the later making more progress.
- \bullet Only the most disadvantaged attended government schools. $\ensuremath{^{\text{Nn}}}$

• The biggest reason for girls opting out of school at the secondary stage was marriage.

\n

 $n\n$

\n

 \bullet Financial cost of education & the earning potential of the student (as labourer) was also another reason. $\ensuremath{\backslash} n$

 $n\n$

What is the way ahead?

 $n\n$

\n

• Better implementation of the Child Marriage Prohibition Act and the Child Labour Prohibition and Regulation Act 2016, is needed to ensure that children stay longer in schools.

۱n

• Adequate investments had to be made in quality pre-school education and capacity building of teachers.

\n

• At the same time, social security networks were needed for the poorest families.
