

## Global Worries on VUCA Factors

### What is the issue?

\n\n

Many government and business organizations across the globe are seriously destabilized due to VUCA factors.

\n\n

### What is VUCA?

\n\n

\n

- The world is experiencing a crazy spin of events because too many uncertainties have plagued it.

\n

- Most organizations exist by adapting to complexities and by behaving flexible because they operate in multiple countries.

\n

- VUCA is an acronym used to describe the state of business, political, societal and ecological world.

\n

- VUCA stands for Volatility, Uncertainty, Complexity and Ambiguity.

\n

\n\n

### What are the instances of VUCA across the globe?

\n\n

\n

- **Volatility** - Brexit is a good example of the VUCA world, Britain's exit from the European Union took the world by surprise.

\n

- A consequence of this political factor has affected economics, commerce, regulatory system and emotional perception of the people at large.

\n

- Syria's war shows no sign of stopping, Syria can be described as several interconnected wars, and it's not government-versus-rebels narrative it started out as part of Arab spring in 2011.

- \n
- The US pressure on Turkey to deal with the ISIS will actually make Turkey more vulnerable to attacks from terrorist groups.
- \n
- Brazil is unable to address its growing fiscal deficit.
- \n
- The war between North Korea and South Korea, and the political instability in many parts of world has increased volatility.
- \n
- **Uncertainty** - In present world, Mergers, acquisitions and takeovers have reached a peak globally because firms are seeking to position and reposition themselves.
- \n
- Making systematically-sound strategic decisions under uncertainty requires mature strategies in a framework for determining the level of uncertainty surrounding strategic decisions and for tailoring strategy to that uncertainty.
- \n
- Management techniques were always based on assumptions about the future, and the use of planning is a major tool of management control.
- \n
- **Complexities** - Globalization has pushed the boundaries of doing business, which has only created a wide gap between developed and underdeveloped markets, increasing the competition from new entrants.
- \n
- The biggest fact today is that the start-ups are giving competition to established businesses in many sectors; bigger and established players are dumbfounded due to creativity and innovation from smaller firms.
- \n
- Organizations today need 24×7 innovative pool of employees, those who can just keep innovation pumping at all levels of business.
- \n
- **Ambiguity** - Too much of information keeps pouring in from everywhere, creating more and more ambiguity.
- \n
- Customers have a lot of information and they are confused about what to buy, how to buy, from where to buy, at what price to buy.
- \n
- Globalization has paved way for a growing number of multichannel at all levels, from governments to citizens, and each is stumbling with their own set of priorities and responsibilities.
- \n

\n\n

**What are the impacts of VUCA on the society?**

\n\n

\n

- The geographical, political, ecological, economical changes are too much of a burden on business organizations.

\n

- Local businesses have fragmented the business world and multinationals have a tough time fighting them.

\n

- Everything has become complex: marketing, sales, pricing, operations, R&D, a firm's infrastructure, supply chains, buyer behavior, big data systems, economic models, getting finances ... everything is challenging.

\n

- Due to random organizational structures, the authority and responsibility lines have become blurred, which creates a big leadership challenge.

\n

- Due to blurring responsibilities of managers, internal complexities keep growing in organizations.

\n

- Employees get busy playing the blame game and politicizing the work atmosphere.

\n

- The same is with governments blurring responsibilities gives way to non-transparency in systems.
