

## Government e-Marketplace

### Why in news?

\n\n

Recently 5 States and a Union Territory (UT) formally adopted the Centre's initiative called the Government e-Marketplace (GeM).

\n\n

### What is GeM?

\n\n

\n

- The Directorate General of Supplies and Disposals (DGS&D) has developed the GeM.

\n

- It is a completely end to end procurement system for purchase of goods and services of common use by the government buyers.

\n

- GeM aims to ensure that public procurement of goods and services in India worth more than Rs. 5 lakh crore annually is carried out through the online platform.

\n

- It promotes transparency eliminates corruption.

\n

- A call centre for GeM has also been set up to help both buyers and sellers in conducting their transactions on GeM.

\n

\n\n

### What are the impacts?

\n\n

\n

- GeM relieves public offices from tedious and time consuming tendering process and thus cuts down on administrative and transaction costs.

\n

- It will help in online registration of suppliers and government buyers using self certification and authentication through Aadhar, PAN, MCA21 and

Biometric Attendance System.

\n

- It will also facilitate seamless process flow and standardised specifications with complete audit trail.

\n

- All transactions in GeM are completely secure.

\n

- It promotes the spirit of cooperative federalism.
