

# **HIV and AIDS (Prevention and Control) Act**

#### Why in news?

\n\n

The Human Immunodeficiency Virus and Acquired Immune Deficiency Syndrome (Prevention and Control) Act came into force recently.

\n\n

#### How does it evolve?

\n\n

\n

• India has the third largest HIV-infected population with an estimated 2 million people.

\n

- The country aims to decrease new infections by 75% between 2010 and 2020 and eliminate AIDS by 2030.  $\n$
- $\bullet$  India is a signatory to the Declaration of Commitment on Human Immunodeficiency Virus and Acquired Immune Deficiency Syndrome (2001).  $\n$
- The Declaration aims to secure a global commitment to enhancing coordination and intensification of national, regional and international efforts to combat it in a comprehensive manner. \n
- The act makes it a legal obligation to protect the privacy of persons with HIV and AIDS.

\n

\n\n

#### What are the provisions?

\n\n

∖n

- **Prohibition** The Act lists various grounds on which discrimination against persons with HIV is prohibited.
  - \n
- These include the denial or discontinuation with regard to employment,

educational establishments, health-care services, standing for public or private office and insurance.

- It removes HIV testing as a pre-requisite for obtaining employment or accessing health care or education.  $\n$
- **Right to reside** It prohibits isolation of segregation of an HIV-positive person.

\n

- $\bullet$  Every HIV-positive person, especially minors, has the right to reside in a shared household and use facilities in a non-discriminatory manner.  $\n$
- It also bars individuals from publishing information or advocating feelings of hatred against HIV positive persons and those living with them.  $\n$
- Consent No HIV-affected person can be subject to medical treatment, medical interventions or research without informed consent.  $\n$
- However, informed consent does not include screening by licensed blood banks and medical research that are not meant to determine the said person's HIV status.  $\n$
- No HIV positive woman, who is pregnant, can be subjected to sterilisation or abortion without her consent.
- **Disclosure** No person is compelled to disclose his HIV status except by an order of the court.

\n

• A breach of violation attracts a jail sentence of up to two years or a fine of up to Rs 1 lakh, or both.

\n

• **Obligation** - Every establishment is obligated to keep HIV-related information protected.

\n

• The state and Centre must make anti-retroviral therapy and opportunistic infection management available to all HIV-infected people, and ensure wide dissemination of the same.

\n

- Every HIV-positive person is compelled to take reasonable precautions to prevent the transmission of HIV to other persons.  $\n$
- **Enquiry** Every state has to appoint one or more Ombudsmen to inquire into violations of the provisions of the Act.

\n

• Failing to comply with the orders of the Ombudsman attracts a penalty of up to Rs 10,000.

\n

- Also, any court cases involving an individual affected with HIV/AIDS is subject to strict protection of individual identity.  $\n$
- This includes restricting cameras in courtrooms if needed. h

\n\n

## What is the way forward?

\n\n

\n

• NACO's method of procurement and its supply chain for the drugs have weakened India's HIV control programme in the previous years due to several instances of stock-outs of antiretroviral drugs.

∖n

- Hence timely procurement of the drugs plays a major role.  $\slash n$
- Also, the number of testing facilities needs to be increased to diagnose and treat as soon as possible.  $$\n$
- Proper implementation of this Act should be done to keep HIV/AIDS-affected persons from facing unnecessary bias.
