

## **Impact of Majoritarianism in Sri Lanka**

### **What is the issue?**

\n\n

The ongoing anti-Muslim violence reflects the long existing trend of ethnic politics and majoritarian triumphalism.

\n\n

### **How did the Muslim political consciousness evolve?**

\n\n

\n

- According to the 2011 Census, Muslims are slightly more than 9% of Sri Lanka's around 20 million population.

\n

- On the other hand, Sinhala Buddhists comprises of 75% and Tamils 11%.

\n

- The language of Sri Lanka's Muslims is Tamil.

\n

- The majority of Muslims still live in the East which was part of the LTTE's (Liberation Tigers of Tamil Eelam) vision of Tamil separate State.

\n

- Until 1990, the Muslims believed they had common cause with Tamil political aspirations.

\n

- But in 1990, the Indian Peace Keeping Force's (IPKF) made departure from Sri Lanka.

\n

- It led to a newly resurgent LTTE, which drove out nearly 100,000 Muslims.

\n

- These Muslims moved from their northern citadel of Jaffna and other parts of northern Sri Lanka.

\n

- The eviction took place overnight and people left behind their houses, lands, shops, and possessions.

\n

- They became a new set of internally displaced people in Sri Lanka's conflict.

\n

- That was when the Sri Lankan Muslim found a new political consciousness.

\n

\n\n

## **How did Buddhist-Muslim hatred evolve?**

\n\n

\n

- Within a decade of its formation, the Sri Lanka Muslim Congress was seen by Sinhala political parties as a “kingmaker” party.

\n

- It won seats in Parliament from the predominantly Muslim areas and the community was in the thick of national politics.

\n

- It has always sided with the ruling party, and is even now part of the coalition government.

\n

- Once the war against the LTTE was over, it was almost as if Sinhala-Buddhist extremism needed a new enemy.

\n

- Muslims have emerged as that enemy.

\n

- The rise of Islamist terrorism provided a convenient handle with which to demonise the community.

\n

- Sri Lanka’s Buddhist extremism has found an ally in Myanmar’s hardline Buddhist monks.

\n

- Both countries practise the Theravada variant of Buddhism.

\n

- Extremist Buddhists in Sri Lanka have clearly taken inspiration from the anti-Rohingya movement in Myanmar.

\n

\n\n

## **What happened with the change of government?**

\n\n

\n

- The majoritarian sentiments were encouraged by the previous Mahinda Rajapakse regime.

\n

- Since then, certain sectarian groups which openly profess hatred for Muslims as well as Christians emerged.

- \n
- Rajapakse's defeat in the presidential election led to a de-escalation of Buddhist-Muslim tensions.
- \n
- But the incidents began occurring again towards the end of 2016.
- \n
- The Muslims, who were displaced from northern Sri Lanka during the war, began going back to reclaim their lands in villages.
- \n
- Around the same time, the Buddhist outfits began a campaign against the arrival of a group of Rohingya in Colombo.
- \n
- The Rohingya group had been taken into custody by the Navy after they attempted to land on the Sri Lankan coast.
- \n
- They were ordered to be kept in the safehouse under UN protection.
- \n
- A Buddhist monk led an attack on a UN-maintained safehouse for the Rohingya in Colombo.
- \n
- The group that attacked the safehouse alleged that Rohingya had killed Buddhists in Myanmar.
- \n
- The clash between Buddhists and Muslims took serious turns.
- \n

\n\n

### **What is the larger concern in Sri Lanka?**

\n\n

- \n
- The current violent situation in Sri Lanka is seen as a direct outcome of majoritarianism among Sinhala Buddhist majority.
- \n
- In all, the ongoing violence in Sri Lanka is more an echo of post-war Sinhala triumphalism.
- \n
