

India-ASEAN Relations

.Why in news?

\n\n

India will host the mega India-ASEAN commemorative summit shortly, marking 25 years of bilateral relations.

\n\n

How did the partnership evolve?

\n\n

\n

- Ever since the launch of the Look East Policy in 1991, the bilateral relations have travelled a long distance.

\n

- The two sides established a Sectoral Dialogue Partnership in 1992.

\n

- This was elevated to a full-fledged dialogue partnership in 1996, and India also became a member of ASEAN Regional Forum.

\n

- The bilateral tie up was further taken to a strategic partnership level in 2012.

\n

- Currently, ASEAN and India have about 30 platforms for engagement, including an annual leaders' summit and ministerial dialogues.

\n

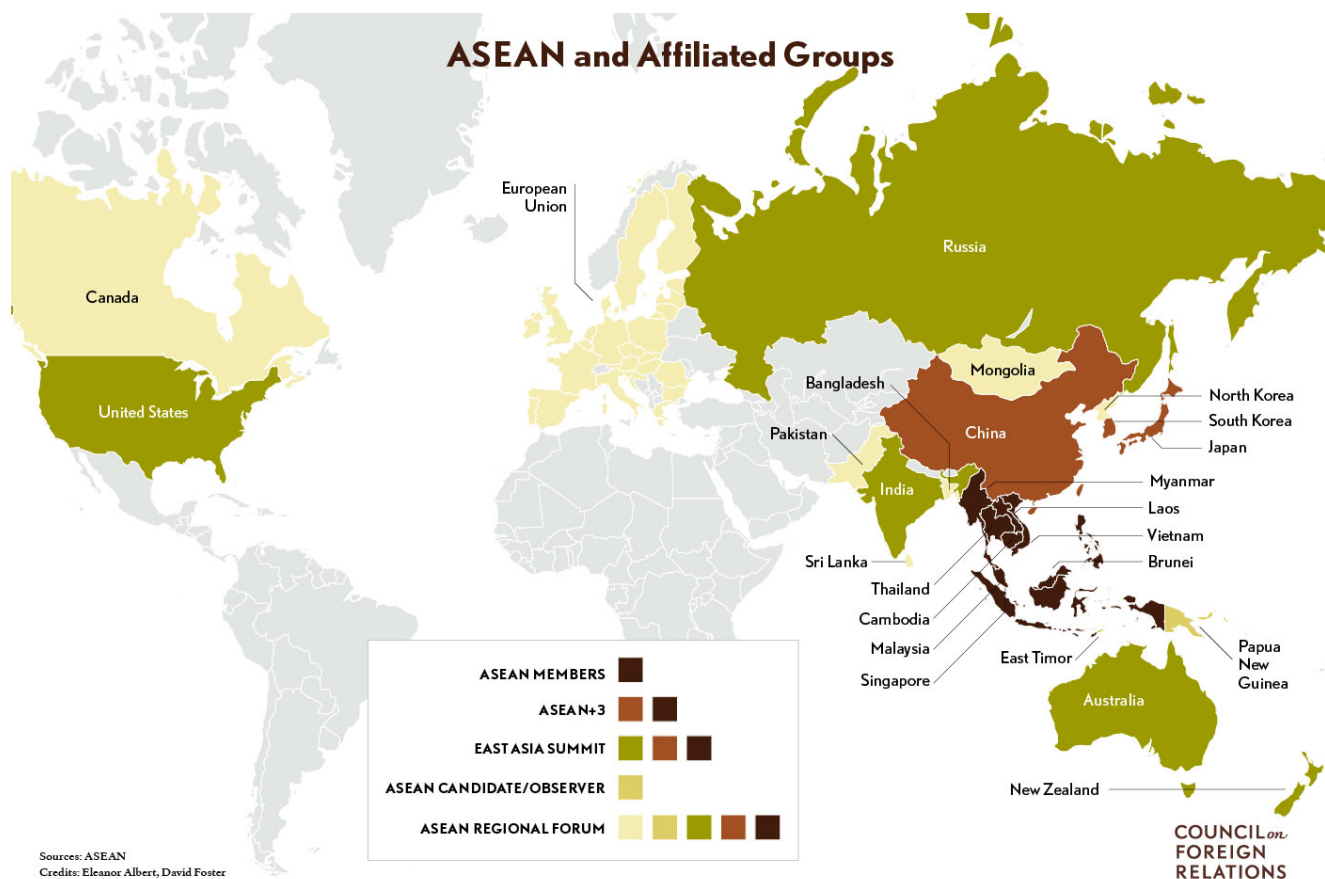

- The India-ASEAN bonhomie has broadened at political, strategic, security and defence level ties, in addition to the economic realm.

\n

- ASEAN is now clearly the central pillar of India's Act East Policy.

\n

\n\n

\n\n

How is the economic integration?

\n\n

\n

- Despite multifrontal engagements, the prime focus continues to be the furtherance of economic and commercial ties.

\n

- Evidently, ASEAN is India's 4th largest trading partner, and India is the 7th largest trading partner of the bloc.

\n

- The economic integration process further strengthened after the creation of the ASEAN-India free trade area in 2010.

\n

- This was followed by the implementation of the India-ASEAN agreement on services and investment in 2015.

\n

- Given all these, the **bilateral trade and investment ties are still way below the true potential.**

\n

- Besides, the balance of trade has always been in favour of ASEAN member countries.

\n

- The Indian FDI into ASEAN nations accounts for 22% of its total outbound FDI; far less in comparison to the US, the EU and Japan.
\n
- Also, the investment share is skewed, with 99% of the total FDI inflows from the region coming from Singapore alone.
\n
- This is because of the Comprehensive Economic Cooperation Agreement with Singapore.
\n
- The other major Southeast Asian economies including Malaysia, Indonesia, and Thailand account for less than 1%.
\n

\n\n

What are the roadblocks?

\n\n

- SMEs are a vital aspect of both Indian as well as the ASEAN economy, contributing nearly 45% to the Indian manufacturing.
\n
- However, a range of factors hamper FDI inflows and SMEs collaboration between India and ASEAN countries.
\n
- Some of them include:
\n

\n\n

- i. challenges in establishing a supply chain
\n
- ii. poor infrastructure
\n
- iii. bad maritime and air connectivity
\n
- iv. bureaucratic costs involved in complex tax and duty structures
\n
- v. licensing, and other business activities
\n

\n\n

- **Complexity** - All the countries of the region have differing levels of socio-economic development, posing a challenge.
\n

- The Indian SMEs have to adjust with a new set of supply-chain strategies to each country's varying regulatory requirements.
\n
- **Technology** - The SME sector in India is hugely dependent on foreign technologies because of lack of in-house R&D.
\n
- **China** - The CLVT countries (Cambodia, Laos, Vietnam and Thailand) are emerging as manufacturing hotspots for China.
\n
- China is increasingly outsourcing its production to countries along the Belt and Road project, mainly ASEAN members.
\n
- Given the low levels of manufacturing, these countries stand to gain from industrial capacity cooperation with China.
\n
- The dominant Chinese footprint in the region makes the competition even tougher for Indian SMEs.
\n

\n\n

What should India focus on?

\n\n

- **Technological upgrading** is pivotal to enabling the SMEs to be more competitive in the global market.
\n
- India's **logistics sector and the supply-chain environment** should be developed to a world-class level.
\n
- The ongoing projects and arrangements for infrastructure development and connectivity should be carried on without delays.
\n
- They include:\n
 - \n
 - \n
 - \n
 - i. India-Myanmar-Thailand Trilateral Highway
\n
 - ii. Bangladesh, Bhutan, India and Nepal (BBIN) Motor Vehicles Agreement, 2016
\n
 - iii. Kaladan Multimodal Transit Transport Project (linking the Kolkata with Myanmar's Sittwe port)

- \n
- \n
- \n
- \n
- \n
- LDCs of ASEAN bloc, like Laos, Vietnam, Cambodia and Myanmar, are the beneficiaries of generalised system of preferences in US and EU.
- \n
- Indian manufacturers setting up business units here are bound to get the benefits while exporting to the US and EU markets.
- \n
- India must use the upcoming commemorative summit to project it as a lucrative investment destination for the ASEAN countries.
- \n
