

India - Azerbaijan and NSTC

What is the issue?

\n\n

\n

- India's External Affairs Minister recently made a visit to Azerbaijan.
- Improving logistics is a key for bilateral trade, and here is how NSTC (North South Transport Corridor) could play a significant role in this regard.

\n

\n\n

How is India-Azerbaijan relation?

\n\n

\n

- Azerbaijan is a strategically located, \$170-billion economy with substantial oil reserves.
- It however ranks low on India's diplomacy index.
- It supports Pakistan's claim on Kashmir, to the extent of calling for “reduction of Indian excesses in India occupied Kashmir”.
- This is a cause of concern and needs focus.
- The period 2000-2010 saw a few senior ministers reaching out through various delegations and platforms to Azerbaijan.
- Despite these, it never really figured even in the second orbit of India’s foreign policy outreach.

\n

\n\n

How is the trade scenario?

\n\n

\n

- Bilateral trade between India and Azerbaijan has been rather different from political diplomacy.
\n
- Trade between the two has shot up almost 10-fold from 2005 to 2017.
\n
- This jump in bilateral trade coincided with the opening of the Baku-Tbilisi-Ceyhan (BTC) oil pipeline to the Mediterranean port.
\n
- Opened in 2007, this where Indian oil companies have been buying substantive quantities of crude oil from.
\n
- ONGC Videsh is an investor in BTC.
\n

\n\n

\n\n

What is the future potential?

\n\n

- Naturally, the bilateral trade between the two countries has largely been hydrocarbon-centred.
\n
- And India is a minor exporter of anything worthwhile (rice, beef and tea are some of the key items exported to Azerbaijan).
\n
- Azerbaijan is looking to diversify and reduce its dependence on hydrocarbons.
\n
- Three sectors that have substantial potential for bi-lateral trade are food processing, pharma and technology.

\n

- In this backdrop, India can play an enabling role in partnering it for the same.

\n

\n\n

What is NSTC?

\n\n

\n

- North South Transport Corridor (NSTC) is a multi-modal network of ship, rail, and road routes.

\n

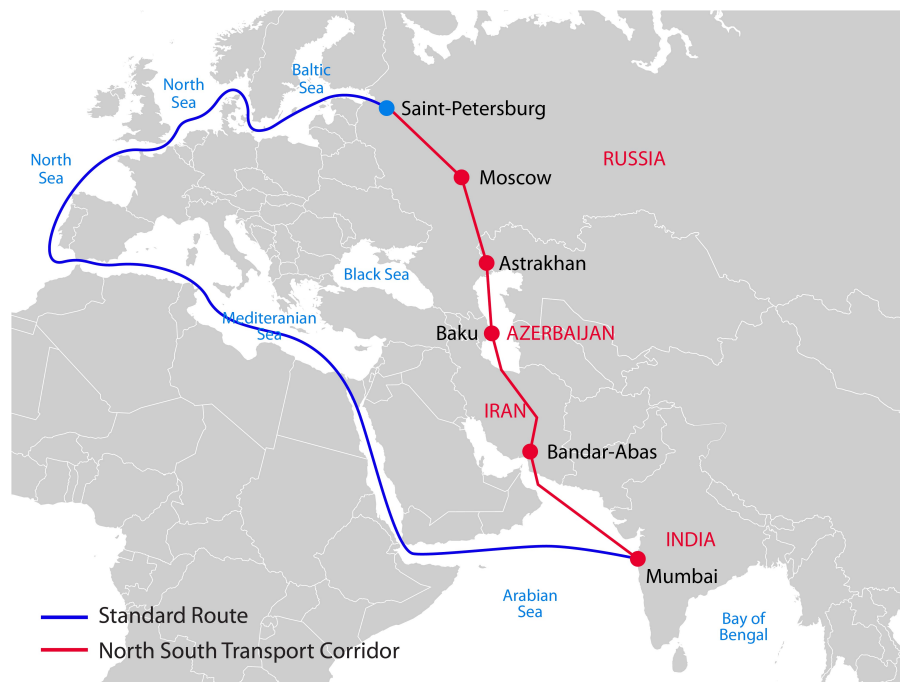

- It is for facilitating freight movement between India, Iran, Afghanistan, Armenia, Azerbaijan and Russia.

\n

- The objective of the corridor is to increase trade connectivity between major cities such as Mumbai, Moscow, Tehran, and Baku.

\n

\n\n

\n\n

What is the significance?

\n\n

\n

- The route bypasses the Suez Canal and will ensure Indian products reach St.

Petersburg in Russia in just 14 days.

\n

\n\n

\n

- At present, this is a 42-day journey, skirting North Africa and Europe.
- Once the Iran-Azerbaijan leg of the NSTC is completed, Indian ports can be linked with Azerbaijan via Iran (Chabahar Port).
- It could provide a smoother logistics experience for suppliers.
- The new route could reduce distance and costs by 40% and 30% respectively.
- It could go a long way in reducing logistical complexity between India and Azerbaijan.
