

India-Pakistan Trade Ties

Why in news?

\n\n

The new Pakistan administration wants the proper trade relations between India.

\n\n

What is the status of India-Pak trade ties?

\n\n

\n

- Pakistan's annual trade deficit, which was \$20.435 billion in 2013, has been rising steadily.

\n

- The deficit has been driven by the rising import bill of capital goods, petroleum products, and food products, and a steep fall in exports.

\n

- The external balance of payments position is expected to be one of the top concerns for the Pak government.

\n

- Trade between Indo-Pak jumped nearly three-and-a-half times between 2000-01 and 2005-06 (from \$251 million to \$869 million per annum).

\n

- But progress was slower in the decade that followed, with volumes rising a little over three times.

\n

- In 2016-17, "new exports" accounted for only 12% of India's total exports to Pakistan.

\n

\n\n

What are the existing Policy bottlenecks in Indo-Pak trade?

\n\n

\n

- **Most Favoured Nation** - Article 1 of the General Agreement on Tariffs

and Trade (GATT), 1994, requires every WTO member country to accord Most Favoured Nation (MFN) status to all other member countries.

\n

- India accorded Pakistan MFN status in 1996; a Pakistani cabinet decision of November 2, 2011 to reciprocate this, however, remains unimplemented.

\n

- **Classifying Imports** - In 2012, Pakistan substituted a “Positive List” of a more than 1,950 tariff lines permitted for import from India, by a “Negative List” of 1,209 lines that could not be imported.

\n

- India announced a 30% reduction in its SAFTA Sensitive list for Non-Least Developed Countries (NLDCs), including Pakistan, allowing for peak tariff on 264 items to be cut to 5% within three years.

\n

- **Land route trade** - Through the Wagah - Attari land route near Punjab only 137 items are allowed currently, and the roadmap to address this has remained unimplemented.

\n

- In 2014, both nations reaffirmed their commitment to expedite normal trading relations, and to provide Non-Discriminatory Market Access (NDMA) on a reciprocal basis.

\n

- While both governments have facilitated a degree of industry outreach in recent years, progress on the ground has been subdued.

\n

\n\n

What are areas which needs to be explored?

\n\n

\n

- **For Pakistan** - An influential grouping of businesses in Pakistan has recently sought a moratorium on new trade agreements, and renegotiation of the trade agreement with China.
- The 100-Day Economic Agenda of the Pakistan Business Council (PBC) has urged the new administration to increase trade with immediate neighbours such as India, Iran and Afghanistan.
- Obstacles in the way of normalising India-Pakistan trade relations, including weak logistics and customs processing, visa and travel

restrictions needs to be addressed.

\n

- **For India** - While India's electricity diplomacy with Bangladesh has broken new ground, a similar initiative with Pakistan continues to hang fire.
- Under a proposal that was actively discussed until early 2015, Pakistan wanted to hook up a portion of Lahore with the Indian side, enabling the capital of its Punjab province to draw electricity from the Indian grid.
- The idea then was to transfer 250-300 MW from India as a short-term fix for Pakistan's power crisis, and there is potential to revive it yet.
