

## India - Switzerland relationship

## Why in news?

 $n\n$ 

The President of the Swiss Confederation is set to visit India to hold extensive talks on a range of issues in bilateral relationship.

 $n\n$ 

## How has India-Swiss relationship been?

 $n\n$ 

\n

- Switzerland's favourable gesture to India started off with the swift recognition of India's independence in 1947.
- Subsequently, the conclusion of the **Treaty of Friendship in 1948** officially laid the foundations for diplomatic engagement between the two countries.
- $\bullet$  Numerous agreements in a wide range of areas have been concluded between the two countries.  $\ensuremath{\backslash n}$
- $\bullet$  These include trade, investment, development cooperation, education, visas, migration, air transport and science and technology. \n
- The recent joint declaration on the mutual automatic exchange of financial account information gains ground on India's fight against black money.

\n

- India has been one of Switzerland's most important **trading partners** in Asia, and Switzerland is the 11th largest **foreign investor** in India.
- Swiss direct investment in India had led to the creation of around 1,00,000 jobs.

 $n\n$ 

## What are the future prospects?

\n

- The upcoming visit aims at deepening the cooperation to address global challenges for the benefit of both the countries.
- The mutual opportunities offered by openness and cooperation gains significance in a time of increasing nationalism and protectionism in global nations.

۱n

- The **free trade** and economic agreements being negotiated by the European Free Trade Association (EFTA) and India, holds good for India and Swiss.
- Climate Policy Unpredictable monsoon rains and the melting of glaciers (in the Himalayas and the Alps) are issues of common concern.
- This holds scope for cooperation in the areas of climate change, sustainable development, water management and energy.
- **Energy** India and Switzerland share common priorities in boosting the share of renewables in their energy mix.
- A number of joint projects are already under way in energy efficiency and renewable energies and holds further potential as well.
- One of them is CapaCITIES, where Switzerland is helping municipal authorities in India to reduce greenhouse gas emissions.
- Infrastructure The world's longest railway tunnel, the Gotthard base tunnel, was recently opened in Switzerland.
- Switzerland's experience in this major rail infrastructure project can best be used by India for its public transport vision.
- Tourism, vocational education and training, digitalisation are also expected to be on the agenda.  $\n$
