

# India US - Import Alert

#### Why in news?

\n\n

The stock of Divi's Laboratories dropped over 20% following the announcement that one its facility has received an import alert from the US drug regulator U S Food and Drug Administration (FDA).

\n\n

### What is import alert?

\n\n

\n

- Companies that sell medicines in the US market are required to comply with the regulations mandated by the FDA.  $\n$
- Manufacturing units that supply drugs to the US are inspected by the FDA periodically.
  - \n
- If they find any lapses in the adherence to the mandated regulations, the same is notified by the FDA in Form 483 as observations.  $\n$
- This is the first level of action by the FDA in case of deviation from the good manufacturing practices (GMP).
  \n
- The company is given time to respond to the observations.  $\space{1mm}\spa$
- If the reply is not convincing the FDA may issue a warning letter.  $\slash n$
- This letter restricts the ability of that manufacturing unit to supply drugs to the US from that facility.  $\nline{\nline{1.5}}$
- Then the company has to appoint consultants to advice on corrective actions and its monitor implementation.  $\gamma_n$
- After this, it approaches the FDA for re-inspection.  $\slash n$

- If the FDA is not satisfied again, it issues an **import alert**.  $\slash n$
- This implies a ban on the facility from supplying drugs to the US.  $\slash n$
- However, there have been instances where the FDA has directly issued an import alert even without an initial warning letter.  $\n$

\n\n

## Why is it important?

\n\n

\n

- The US is the largest pharmaceutical market in the world.  $\space{\space{1.5}n}$
- The share of Indian pharma companies in the US market has risen significantly over the past few years, catering nearly 40% of its pharma drug requirement.

∖n

- Many patents are expected to expire in the upcoming years, opening a huge market for generic drugs from India.  $\n$ 

\n\n

∖n

- So to an investor in pharma stocks, it is important to keep a close tab on the regulatory action by the FDA as they can pose growth risks.  $\n$
- The progression of observations into import alerts and warning letters has been increasing of late.  $\gamma_n$
- So investors need to focus on the speed with which a company resolves these issues.
