

Indo-China joint proposal on WTO

What is the issue?

\n\n

\n

- India and China has reiterated its support for a joint proposal by the nations at the World Trade Organization (WTO).

\n

- The proposal assumes importance in view of the ongoing negotiations for the upcoming WTO Ministerial Conference in Buenos Aires, Argentina.

\n

\n\n

What is this Joint proposal is about?

\n\n

\n

- The countries had jointly submitted a proposal to the WTO calling for the elimination of the most trade-distorting form of farm subsidies.

\n

- This is against farm subsidies provided by rich nations to their farmers.

\n

- The India-China proposal had targeted 'Aggregate Measurement of Support' (AMS) or 'Amber Box' support in WTO parlance.

\n

- This counters efforts by rich nations led by the United States, EU and Brazil to target the subsidies of the developing countries.

\n

\n\n

What is the need for such proposal?

\n\n

\n

- Developed countries have been consistently providing trade-distorting subsidies to their farmers at levels much higher than the ceiling currently applicable to developing countries.

\n

- The proposal reveals that subsidies for many of these items are over 50 per cent with some even having more than 100 per cent support.
\n
- Developed countries have more than 90 per cent of global AMS entitlements amounting to nearly \$160 billion.
\n
- On the other hand, most developing nations, including India and China, do not have AMS entitlements.
\n
- Again, developing countries are forced to contain it within 10 per cent of the value of production.
\n

\n\n

What is India's Stand over Agri subsidies?

\n\n

- India provides a subsistence amount of about \$260 per farmer per annum compared to over 100 times more in some developed countries.
\n
- Following India's agreement with the US on the issue in 2013, the Bali Ministerial Conference came up with the "peace clause".
\n
- It permitted uninterrupted implementation of India's food security programme till a permanent solution was found.
\n
- On this issue, India has informed the WTO that its input farm subsidy which includes those for fertilisers, irrigation and electricity did not go beyond the permissible limit.
\n
- These are part of the 'green box' or non-trade distorting subsidies that are allowed without limits for countries such as India which has millions of poor farmers.
\n
- For a permanent solution, India has proposed either amending the formula to calculate the food subsidy cap of 10 per cent, which is based on the reference price of 1986-88 or allowing such schemes outside the purview of subsidy caps.
\n

\n\n

What are the challenges for India in WTO?

\n\n

\n

- BRICS nations have proposed an Investment facilitation, which brings transparency in investment facilitation on a voluntary basis.

\n

- Among BRICS, only India is not ready in taking up the Investment facilitation plan to WTO.

\n

- Reacting to the proposal, Brazil and the European Union have already came together calling for a crackdown on exports of food stocks meant for public stockholding.

\n

- Apart from Brazil, Russia and China, there are a large number of other traditional supporters of investment facilitation at the WTO such as Japan, Switzerland, the EU, Canada and New Zealand
