

# **Infrastructure Status to Logistics Sector**

#### Why in news?

\n\n

The government has recently granted infrastructure status to the Indian logistics sector.

\n\n

#### What was the need?

\n\n

∖n

- India is home to leading industries such as automotive components, pharmaceuticals, cement, textiles, FMCG and e-commerce.  $\n$
- Their operations depend hugely on warehousing and logistics.  $\slashn$
- But India is ranked 35 out of 160 countries on the World Bank's Logistics Performance Index (LPI).
  - ∖n
- The logistics spend in India also is almost 13% of the GDP, compared to well below 10% for the advanced countries.  $\n$

\n\n

#### What is the significance of Infrastructure status?

\n\n

\n

- It includes the logistics sector in the master list of infrastructure sub-sectors under a new head 'Transport and Logistics'.  $\n$
- Minimum investment and area requirements to get the infrastructure tag for each category like multi-modal logistics park, cold chain facility and warehousing facility have been clearly defined.
  - \n
- Easy Credit This makes it easier for companies operating within these segments to raise long-term credit from banks and other financial

institutions at lower rates.

\n

- The inclusion also makes it easier for logistics companies to -n
  - \n 1. Access larger amounts of funds as External Commercial Borrowings
    - (ECB) \n
  - 2. Access longer-tenure funds from insurance companies and pension funds
    - ∖n

\n

3. Be eligible to borrow from India Infrastructure Financing Company Limited (IIFCL)

\n

\n

• It also helps attract foreign investments.

∖n

• Lower cost of logistics - This also means that development firms with larger land parcels can utilise their excess land holdings to develop more infrastructure facilities, thereby boosting the supply of warehousing facilities.

\n

• The coupled with easier access to capital will eventually bring down the cost of logistics.

\n

\n\n

∖n

 The LPI measures the state of trade and logistics based on parameters like customs, infrastructure, international shipments, logistics quality and competence, tracking and tracing and timeliness.

\n\n

## What are the immediate impediments?

\n\n

\n

• An inadequate road network and losses that occur during transportation are huge problems.

\n

 $\bullet$  Improvement of India's road infrastructure at a much faster pace is critical to minimise losses, both economic and environmental.  $\n$
