

Israel's Dwindling Options in Syria

What is the issue?

\n\n

\n

- Israel got itself involved in the Syrian war in order to contain increasing Iranian influence in Syria.

\n

- But the tide seems to be against it and its option is limited at present.

\n

\n\n

How has the Israel - Syria hostility evolved over the years?

\n\n

\n

- In the 1967 war, Israel captured the strategic "Golan Heights" on the Israeli-Syria border from Syria and continues to occupy the region even now.

\n

- In the 1980s, Syria intervened in Lebanon and helped militants like Hezbollah who were resisting Israeli occupation of Lebanon.

\n

- While Syria and Israel do not have formal diplomatic ties, they've not had a direct confrontation for more than 50 years now.

\n

- Additionally, despite the hostility towards the current longstanding Assad regime, Israel's border with Syria has been very calm for years.

\n

- When the crisis broke in Syria in 2011, Israel was a fence sitter as it didn't want to displace the stable secular dictatorship of Assad.

\n

- Notably, this was more because the possible replacement was an uncertain bunch of militant religionists.

\n

- But as the Syrian civil war evolved into a regional conflict over the years, and Israel's strategic calculations seem to have changed too.

\n

\n\n

What forced Israel's intervention into the Syrian war?

\n\n

\n

- The Syrian war is very complex and multiple players have aligned with each-other for strategic reasons even if their end goals were non-compatible.

\n

\n\n

\n

- As the Syrian regime's position weakened, Iran sent in trained Shia militants from various counties to fight for saving the regime.

\n

- Notable among them is Hezbollah, which is a Lebanese Shia militia that is backed by Iran, which sent thousands of its troopers to fight in Syria.

\n

- Besides the government army, these militias fought the war on the ground on behalf of the regime, and also received technical support from Iran.

\n

- The growing role of Hezbollah and Iran in Syria alarmed Israel, as Hezbollah and Israel have had multiple direct confrontations in the past.

\n

- Notably, it was Hezbollah's guerrilla resistance that forced the Israel withdrawal from Lebanon in 2000 after 18 years of occupation.

\n

- Also, Israel's 2006 bombardment on Hezbollah's weapons infrastructure in Lebanon and the subsequent month offensive failed in its stated objectives.

\n

- Notably, Hezbollah now has a heavy military presence along southern Lebanon which is across Israel's northern border.

\n

\n\n

What was the Israeli strategy?

\n\n

\n

- To counter the Iranian activities, Israel had adopted a two-pronged strategy.

\n

- **1st strategy** - The plan was to deter Hezbollah and other Iranian proxies from taking control of its Golan border region (Israel - Syria border).

\n

- Israel hence decided to strengthen anti-regime rebels in southern Syria, which is closer to the Golan border.

\n

- While initially, Israel offered mere medical aid and humanitarian assistance to the rebels, it has lately acquired military and logistical dimensions.

\n

- Tel Aviv is said to be offering support to seven different rebel groups in the region, that also includes a faction of the US-backed Free Syrian Army.

\n

- Besides providing money, weapons and intelligence, Israel also supported the advances by these groups on the ground with air cover.

\n

- Notably, one such aerial mission saw Israel bombing regime positions in as the local rebel groups backed by it came under heavy attacks from the regime.

\n

- **2nd strategy** - For its own strategic reasons, Russia intervened directly in the Syrian war in 2015 to support the regime.

\n

- As this seems to be pitting Israeli backed forces in conflict with Russian endeavours, Israel commenced active war diplomacy with Russia.

\n

- This ultimately helped Israel gain Russia's tacit acceptance to not interfere in Israeli offensive against Hezbollah positions within Syria.

\n

- Hence, despite Russia controlling most of Syria's airspace since 2015, Israel retained the freedom to aerially strike Hezbollah positions at will.

\n

- Notably, in 2017 alone Israel claims to have struck suspected weapons shipments to Hezbollah around 100 times.

\n

\n\n

How successful was the intervention?

\n\n

\n

- It wasn't regime change but the growing Iranian influence in Syria that concerned Israel, for which it was supporting rebel elements.

\n

- Israel hoped that Russian intervention on the Syrian regime's behalf would reduce its dependence on Iran.

\n

- But Russia remained ambiguous, and neither stopped Israeli assault on Hezbollah nor stopped the expansion of Iranian footprint in Syria.

\n

- Hence, even as the government is recovering its control back, the regime-friendly Iranian presence is only growing in Syria.

\n

- The network of rebels, who are being backed by Israel are currently losing ground rapidly and international support is also correspondingly dwindling.

\n

- While the US was rock solid behind these rebel groups in the initial years, it has wanted to withdraw since Trump administration took over.

\n

- Late last year, the regime regained a foothold near the Israeli border by washing out the rebels in some areas, which has also spooked Israel.

\n

- Also, recently, Israel carried out an aerial assault in Syria against "Iranian targets", and an Israeli jet was subsequently downed by Syrian fire.

\n

- On the whole, the entire episode looks like a comprehensive failure.

\n

\n\n

How does the future look?

\n\n

\n

- Israel has strengthened its bombing campaign in Syria this month and has also issued a sternly warned Iran of dire consequences.

\n

- But beyond rhetoric, Israel's capacity to shape reality in Syria is limited, as Iran's clout has been established strongly over the war years.

\n

- Hezbollah has also been emboldened and looks too strong to be eliminated by mere aerial rides, at a time when full-scale intervention is not an option.

\n

- As the regime gains further strength, it will begin its onslaught on the Israeli backed rebels in the south, which will make things murkier for Tel Aviv.
