

Jerusalem as Israel's Capital - US

Why in news?

 $n\n$

\n

- U.S. President Trump reversed the decades old policy, and recognised Jerusalem as the capital of Israel.
- The US administration would also begin a process of moving the U.S. embassy in Tel Aviv to Jerusalem.

What is the tussle with Jerusalem?

 $n\n$

\n

- \bullet Jerusalem is in ways <u>symbolic of the Israel-Palestine conflict</u> itself.
- The tussle centres on who gets to control the <u>ancient city that is sacred to Jews, Muslims and Christians</u>.
- After the end of the First Arab-Israel War in 1948, Jerusalem was partitioned into West and East, under Israeli and Palestinian control respectively.
- But in 1967, during the Six-Day Arab-Israel War, <u>Israel snatched East</u> <u>Jerusalem</u> from Jordanian forces.
- Israel's Parliament also declared the territory had been <u>"annexed to Israel"</u> and Jerusalem had been <u>"reunited".</u>
- The predominantly <u>Palestinian population in the east</u> lives under full <u>Israeli control</u>, but cannot vote in parliamentary elections.
- This marginalised the Palestinians, who wanted East Jerusalem to be their capital under the "two-state solution".
- Israel was undeterred by the refusal of the international community to endorse the annexation.

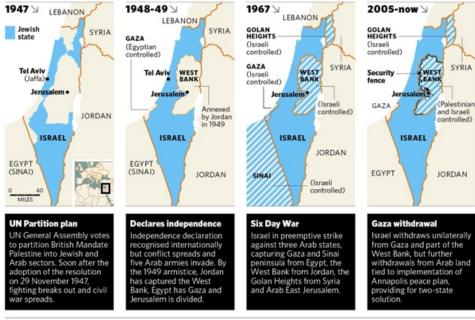

\n

• It further added over 200,000 Jewish settlers to the once-almost entirely Arab East Jerusalem.

 $n\n$

\n

- Meanwhile, in 2016, the <u>UN reaffirmed</u> that Jerusalem's Palestinian territories were under "hostile occupation". $\$
- The international community considers east Jerusalem illegally occupied by Israel.

۱'n

- Notably, <u>foreign embassies to Israel are in Tel Aviv</u> and not Jerusalem.
- India for its part has traditionally backed a two-state solution, and assured that the Indian embassy would stay in Tel Aviv.

What is the significance of the US's move?

 $n\n$

\n

• **Jerusalem** - Jerusalem is almost the key to stability of the entire Middle East.

\n

• It has many shrines that are equally significant for the Jews, the Muslims and the Christians.

\n

- Trump's move reflects Jerusalem as the centre of Jewish faith, and the fact that the city is the seat of the Israeli government.
- US Trump expressed hope for start of the peace process and reiterated his commitment to the two-state solution to the Israel-Palestine conflict.
- The effort to please the core base of <u>pro-Israel hardliners</u> and the overwhelming <u>Jewish population</u> in US cannot be denied.
- \bullet But, as with most political developments in the Middle East, a bigger regional game could also be behind. \n
- \bullet This possibly includes a $\underline{\text{US-Saudi-Israel alliance}}$ against Iran, the common enemy.

\n

- **Response** The UN Secretary General voicing dissent had said that the issue on the holy city must be resolved only through direct negotiations.
- The Islamic world is outraged and many Arab leaders warned it could <u>trigger</u> an upheaval in the already volatile Middle East.
- Palestine has warned of dangerous consequences and said the decision was a <u>declaration of war</u> in the region.
- Neighbouring Jordan and Turkey have cautioned the US and have threatened to cut <u>ties with Israel</u>.
- $\underline{\text{Militant groups in the region}}$ could possibly take aggressive stances.
