

## Multiplicity of Challenges in Myanmar

### What is the issue?

\n\n

Besides the infamous Rohingya crisis, Myanmar also saw multiple challenges on the fronts like press freedom and the “Panglong peace process” in 2017.

\n\n

### What are the events that defined Myanmar of 2017?

\n\n

\n

- Both the civilian government and the military establishment of Myanmar (which is politically powerful), had a rough 2017.

\n

- The issues of - Threats to press freedom, Rohingya refugee crisis, and peace process with the country’s armed ethnic groups got international attention.

\n

- The civilian government of Ms.Suu Kyi’s NLD, attracted severe criticism for its failure to act on these issues more effectively.

\n

- **Press Freedom** - At least 11 journalists of (both Myanmarese and foreigners) have been arrested in the past year on trivial charges.

\n

- Notably, two Reuters reporters were arrested on the charges under the colonial-era “Official Secrets Act” for ‘illegally acquiring information’.

\n

- It is speculated that they were collecting documents regarding the conduct of security forces in Rakhine state, the duo could possibly get long prison terms.

\n

- **Rohingya Crisis** - The UN has called the militaristic crackdown in Rakhine as “ethnic cleansing”, and media has been blacked out in the region.

\n

- Up until now, the gruesome horrors unleashed by the security forces are primarily coming from the Rohingya refugees who have fled to Bangladesh.

\n

- But despite serious international condemnation, Myanmar has denied any

wrongdoing and claims that its offensives are only targeted against ARSA (Rohingyan rebel militia), which is officially a terrorist outfit in Myanmar.

\n

\n\n

## How is the 'Panglong Peace Conference' progressing?

\n\n

\n

- Besides the Rohingyas, there are multiple armed ethnic rebels in Myanmar and Ms. Suu Kyi has been prioritising peace with them.

\n

- Consequently, the 2<sup>nd</sup> session of "Panglong Peace Conference" was convened in May 2017, to discuss on a 41 point agenda.

\n

- **Positives** - This brought together the government, military and ethnic rebel leaders and agreement was reached on 37 issues.

\n

- The rebel groups agreed to recognize a democracy union with federalist polity that gives considerable rights for ethnic self-determination.

\n

- On its part, the government agreed to treat all ethnicities equally and privileged the provinces to write their own sub-constitutions within Myanmar.

\n

- **Challenges** - However, the calls for dissolution of rebel armies to pave the way for the constitution of a single national army haven't been agreed.

\n

- Contrarily, the rebels vouch for a federal army to enable them retain independent command structures.

\n

- Also, there have been some hiccups with the technicality of whether to specifically iterate the clause for "non-secession" in the peace accord.

\n

- Also, another major concern is that out of the more than 20 armed groups, only 8 have signed the current "Nationwide Ceasefire Agreement" thus far.

\n

- While the 3<sup>rd</sup> round of the Panglong Conference has been scheduled for late January, the future looks uncertain.
