

New Green Cardamom Species

Why in News?

Recently, an international team of researchers have identified 2 new species that are close cousins to green cardamom.

- **Green cardamom** It is the *most valuable spice plant in the world* and of huge economic importance.
- Taxonomy
 - Scientific name Elettaria cardamomum.
 - Genus Elettaria, now <u>has 7 species</u>.
- It is based on the spice's *old Malayalam name*, *Elletari* which is used by Hendrik van Rheede in the 17th century.
- **Seed capsules** It provides the commercial green cardamom.
- It is known as **Queen of Spices**.
- 2 new species Elettaria facifera and Elettaria tulipifera.
- Discovered in Western Ghats regions of Kerala.

Elettaria Facifera

- Found in Kerala's **Periyar Tiger Reserve** in Idukki district.
- **Morphology** It is distinguished by sessile leaves, erect flowering shoots that are separate from the leafy shoots, and pure white labellum with purple-red markings.
- Mannan tribe They refer to it as the *Vai noki elam*, (loosely, Open-mouth cardamom) due to the fruit's resemblance to an open mouth.

Elettaria Tulipifera

- Found in Agasthyamalai hills in Thiruvananthapuram district.
- **Morphology** It has strikingly beautiful tulip-shaped inflorescence and large, bright to dark red, whorled bracts.

• **Conservation** – The researchers have underlined the need for conservation efforts as both species face threats.
