

Nutrition Status & Non-Communicable Diseases - A Study

What is the issue?

 $n\n$

\n

• 'National Nutrition Monitoring Bureau' carried out an nationwide study during 2015-16.

\n

 It established nutritional deficiencies and the increasing threat of Non-Communicable Disease - NCDs in urban India.

 $n\$

What does the study say?

 $n\n$

\n

- \bullet The study assessed the prevalence of Obesity, Hypertension & Diabetes and its relation to dietry and nutritional patterns.
- A survey was done among urban dwellers across 16 states (& union territories).

۱'n

- Increased NCDs have mainly been attributed to changing food habits & unhealthy lifestyles.

\n
