

## Pandemic Fund Project

### Why in News?

Recently “Animal Health Security Strengthening in India for Pandemic Preparedness & Response” initiative has been launched by the Indian government under Pandemic Fund Project.

### What are the needs of animal health management?

- **Public Health Emergencies** - In the past few decades, WHO declared 6 public health emergencies of international concern, and 5 of these have had animal origin.
- **Increasing Zoonosis** - About two-thirds of infectious diseases affecting humans originate from animals.
- **Zoonotic Mortality** - Zoonotic diseases account for more than 1 Billion cases and 1 Million deaths per year.
- **Pandemic Preparedness** - COVID-19 pandemic acknowledged that pandemic preparedness and response (PPR) needs a One Health approach and a focus on animal health security.
- **Protect Livestock Wealth** - 536 million livestock and other animals of India requires measures to prevent and manage infection outbreaks.
- **Food Safety** - Unsafe food causes 600 M cases of foodborne diseases and 0.42 M deaths.
- **Prevent Economic Losses** - SARS and Avian flu are estimated to have caused global economic loss of \$50 Billion, and \$30 Billion, respectively.
- **Poverty Threats** - Animal disease outbreaks also threaten to reverse the gains made in poverty reduction.

### What is the Pandemic Fund Project?

- **Pandemic Fund Project** - The project “Animal Health Security Strengthening in India for Pandemic Preparedness & Response” is launched under the G20 Pandemic Fund .

*G20 Pandemic Fund was created by G20 countries under Indonesian presidency in 2022 to assist low-and middle-income countries in strengthening their capacities to identify, report and contain future pandemics.*

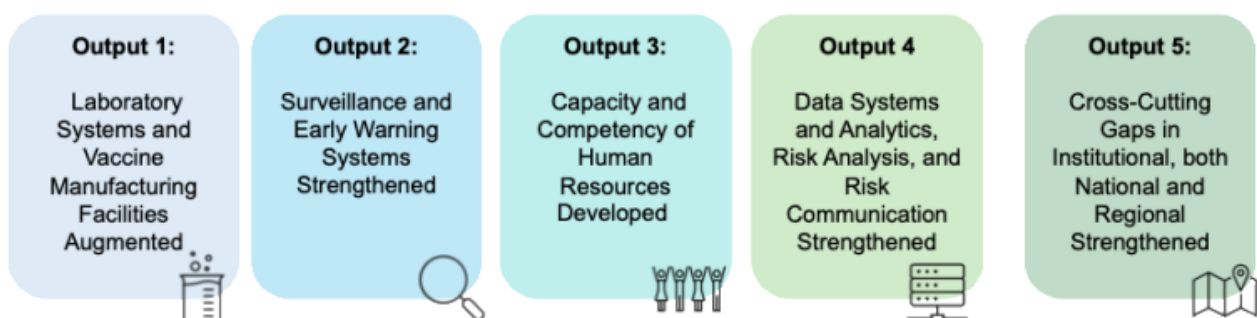

- **Nodal Ministry** - Union Ministry of Fisheries, Animal Husbandry and Dairying.
- **Objective of the Project** - To enhance the country's capacity to prevent, detect, and respond to animal health threats.
- **Implementation** - It is being implemented through three implementing entities Asian Development Bank (ADB), the World Bank, and the Food and Agriculture Organization (FAO).

### What are the major interventions under the project?

- **Augmentation of Laboratory Systems** - Upgrading and expanding animal health laboratories and developing laboratory networks.
- **Strengthening of Surveillance and Early Warning Systems** - Enhancing early warning systems and building robust sentinel and passive surveillance mechanisms to detect potential outbreaks at an early stage and facilitate timely interventions.
- **Human Resources Development** - Enhance the skills and capabilities of animal health human resources.
- **Upgrading data management systems** - Strengthening of Data Systems, Analytics, Risk Analysis for better risk assessment, improved decision-making, and more effective communication strategies related to animal health risks.
- **Addressing Institutional Capacity Gaps** - Strengthen institutional capacity at both national and regional levels by supporting the development of a disaster management framework for the livestock sector and AMR management.

### What are the expected outcomes of the project?

- **Outcome** - Impact of the project would be
  - To reduce the risk of pathogen emergence from animals (domesticated and wildlife)
  - Prevent transmission to the human population
  - Endangering the health, nutritional security, and livelihoods of vulnerable populations.
- The project is designed to enhance India's animal health security through the following five key outputs

## Quick facts

### 2019 Livestock Census

- Total livestock population of India 535.78 million.
  - 192.9 million cattle
  - 148.88 million goats
  - 109.85 million buffaloes
  - 74.26 million sheep
  - 9.06 million pigs
- All other animals taken together contributed just 0.23% of the total livestock population in India.
