

## **Pellet Gun Causalities**

### **Why in news?**

\n\n

SHRC report estimates reveals that approximately 2,500 people were injured by the use of pellet guns in J&K.

\n\n

### **What type of weapon are pellet guns?**

\n\n

\n

- They are a form of non-lethal crowd control methods used by police and military worldwide.

\n

- The other popular methods are tear gas, water cannon, pepper spray, laser guns etc.

\n

- Pellet guns are also popular in hunting and pest control.

\n

- Pellet guns were first introduced in J&K after the 2010 protests, when 100 people were killed in firing by the security forces.

\n

\n\n

### **What does recent estimates reveals?**

\n\n

\n

- Recently a report was submitted by the deputy commissioners of eight districts in Jammu and Kashmir to the State Human Rights Commission (SHRC).

\n

- The data reveals enormous costs social, political and economic of the indiscriminate use of pellet guns.

\n

- It have revealed that at least 2,524 people were injured by the use of pellet guns by security forces during the July 2016 protests in J&K.

\n

- The state government has confirmed the identity and nature of injuries of about 1,700 victims, including 59 women.

\n

\n\n

### **What are the necessary measures taken by the government?**

\n\n

\n

- J&K government has announced compensation for the victims.

\n

- This the first step taken towards addressing and alleviating the grave hurt and damage that injuries, especially the loss of eyesight, has caused to victims.

\n

- State government had also planned to provide government jobs to those who have been blinded, apart from providing economic relief.

\n

- The union government is also looking at non-lethal alternatives to pellet guns and planning to phase out the weapon completely.
