

Political turmoil in Brazil

Why in news?

\n\n

The incumbent Brazilian President, Michel Temer, has been indicted in a scandal.

\n\n

What is the reason?

\n\n

\n

- The President is accused of his involvement in the authorisation of heavily subsidised public loans for a private corporation in return for political patronage.

\n

- He has denied the charges.

\n

- The requisite vote in the lower House of Congress to authorise a criminal trial may not materialise eventually, as most members are themselves facing investigations.

\n

- Last year, the then President, Dilma Rousseff was impeached.

\n

- She was implicated over a scandal in the state-owned oil giant and its construction arm.

\n

- Mr. Temer was the Vice-President then.

\n

\n\n

What should be done?

\n\n

\n

- This continuing turmoil puts at risk assurances of reforms to Brazil's labour laws and generous pension system.

\n

- Brazilian Left leaned too much towards an unsustainable populist agenda

during the years of the commodities boom.

\n

- On the other hand, Right appear ill-equipped as a realistic alternative despite attempts to attract overseas investment.

\n

- Brazil badly needs a strong centre that is not tempted to populism and assure accountability.
