

Pradhan Mantri Jan Arogya Abhiyan

Why in news?

\n\n

The government rolled out Pradhan Mantri Jan Arogya Abhiyan recently.

\n\n

What is the scheme all about?

\n\n

\n

- The programme is being touted as the world's largest health protection scheme.

\n

- The scheme has two pillars under it –

\n

\n\n

\n

1. **Ayushman Bharat (AB)** - 5 lakhs health sub-centres will be converted into health and wellness centres.

\n

2. **National Health Protection Mission (NHPM)** - Provides health cover of Rs. 5 lakhs per family, per annum, reaching out to 50 crore beneficiaries.

\n

\n\n

\n

- The benefits of the scheme are portable across the country for secondary and tertiary care hospitalisation.

\n

- Also, a beneficiary covered under the scheme will be allowed to take cashless benefits from any public/private empanelled hospitals across the country.

\n

- **Coverage** - The scheme will aim to target over 10 crore families based on SECC (Socio-Economic Caste Census) database.

\n

- It will target poor, deprived rural families and identified occupational

category of urban workers' families.

\n

- It will cover 1,300 illnesses, including serious ones such as cancer and heart diseases.

\n

- Private hospitals would also be part of the scheme.

\n

- To ensure that nobody from the vulnerable group is left out of the benefit cover, there will be **no cap on family size** and age in the scheme.

\n

- The insurance scheme will cover pre and post-hospitalisation expenses, including pre-existing illnesses.

\n

- **Funding** - The expenditure incurred in premium payment will be shared between central and state governments in a specified ratio -

\n

\n\n

\n

1. 60:40 for all states and UTs with their own legislature.
2. 90:10 in Northeast states and the three Himalayan states of Jammu and Kashmir, Himachal and Uttarakhand.
3. 100 per cent central funding for UTs without legislature.

\n

\n\n

\n

- The states are also free to continue with their own health programmes.

\n

- **Mode of funding** - In a trust model, bills are reimbursed directly by the government.

\n

- Andhra Pradesh, Telangana, Madhya Pradesh, Assam, Sikkim and Chandigarh are the states that will use a trust model for the mission.

\n

- In an insurance model, the government pays a fixed premium to an insurance company, which pays the hospitals.

\n

- Gujarat and Tamil Nadu have opted for mixed mode implementation.

\n

\n\n

What more does it need?

\n\n

\n

- **Primary care** - The NHPM is pushing for hospitalisation at secondary and tertiary-level private hospitals, while disregarding the need for accessing primary care.

\n

- Hence, households should be made to register at the 1.5 lakh 'health and wellness clinics'.

\n

- It should provide them access to district-specific, evidence-based, integrated packages of preventive health care.

\n

- It will also result in early detection of cancers, diabetes and chronic conditions, mostly needing long-term treatment and home care.

\n

- This will further minimise the demand for hospitalisation.

\n

- Investment in primary care would thus reduce the overall cost of health care for the state and the consumer.

\n

- **Private sector** - The National Health Policy 2017 proposed "strategic purchasing" of services from secondary and tertiary hospitals for a fee.

\n

- Competent health-care providers from private sectors can be roped in and standard treatment protocols and guidelines notified by the government.

\n

- This will rule out potential for any unnecessary treatment, since the fees are getting fixed per episode, and not per visit.

\n

- **Competition** - Health-care providers should be accredited without any upper limit on the number of service providers in a given district.

\n

- The annual premium for each beneficiary would be paid to those service providers, for up to a renewable one year, as selected by beneficiaries.

\n

- This will enhance competition and service quality while keep costs in check.

\n

- Also, District hospitals be upgraded to government medical colleges and teaching hospitals, so that capacities at the district levels be increased.

\n

- **Sectoral co-ordination** - Clean drinking water, sanitation, garbage disposal, waste management, food security, nutrition and vector control under various ministries be brought together to link health with development.

- \n
- Swachh Bharat programme could be incorporated in the PMJAY, so that the overall co-operation of all these sectors will reduce the disease burden.
- \n
- **Technology** - AI-powered mobile applications will soon provide high-quality, low-cost, patient-centric, smart wellness solutions.
- \n
- The scalable and inter-operable IT platform being readied for the Ayushman Bharat is encouraging.
- \n
- Thus, with the integration of prevention, detection and treatment of ill-health, PMJAY would become a well-governed 'Health for All' scheme.
- \n
