### **Sathyamangalam Tiger Reserve**

\n\n

\n

- The Forest Department has identified hundreds of leopards in Sathyamangalam Tiger Reserve.

\n

- It is a protected area and tiger reserve along the Western Ghats in the state of Tamil Nadu.

\n

- It was first declared as a wildlife sanctuary in 2008 and it is the largest wildlife sanctuary in Tamil Nadu.

\n

- It later became the fourth tiger reserve as a part of project Tiger.

\n

- It is a significant wildlife corridor in the Nilgiri Biosphere reserve between western ghats and the rest of the eastern ghats.

\n

\n\n

### **Green Masala Bonds**

\n\n

\n

- Indian Renewable Energy Development Agency (IREDA) has raised \$300 million via "Green Masala Bonds" at the London Stock Exchange (LSE).

\n

- This is the first green masala bond on LSE's new International Securities Market.

\n

- The money raised from the green bond will go towards financing renewable energy project across India.

\n

- The bonds are certified by Climate Bonds Initiative, an international, not-for-profit organisation that helps build robust framework around green bond investment.

\n

- IREDA, a state-owned company established a a non-banking financial

institution.

\n

- It extends financial assistance for renewable energy and energy efficiency conservation projects in India.

\n

\n\n

## **New drug for Chikungunya**

\n\n

\n

- Researchers from IIT roorkee used an existing anti-viral drug piperazine for the cure of chikungunya.

\n

- Currently, there is no cure for the disease.

\n

- Piperazine is used for the treatment of worm infections.

\n

- The anti-viral activity of piperazine molecule inhibits virus replication.

\n

- The drug binds to the target, the protein's interaction with the enveloped protein of virus is inhibited and hence the virus release from infected cell is affected.

\n

\n\n

## **Molecular robot**

\n\n

\n

- Scientists have created the world's first 'molecular robot' that can be used to build molecules and may help discover novel drugs.

\n

- The robot is millionth of a millimetre in size and made up of carbon, hydrogen, oxygen and nitrogen atoms.

\n

- It can be programmed to move and build molecular cargo using a tiny robotic arm.

\n

\n\n

## **US-2 Amphibian**

\n\n

- \n
- It is Japan's aircraft, designed for air-sea rescue work.
- \n
- The Indian government has been keen on acquiring the US-2i as part of their expanding bilateral strategic partnership.
- \n
- The aircraft requires only one fourth of the distance that commercial airlines require for takeoff and landing.
- \n
- The aircraft has an approximate operational range of 4500 km and a cruise speed of 480 km/hr. It does not require runway construction.
- \n

\n\n

### **No More reservation Charts**

\n\n

- \n
- The Indian Railways has decided to stop pasting reservation charts on train coaches.
- \n
- It is implemented as a part of Go Green Policy in five cities - Chennai, New Delhi, Kolkata, Mumbai and Bengaluru.
- \n
- The initiative is a pilot project to keep the coaches neat and clean.
- \n
