### Air Safety Oversight Score

\n\n

∖n

- A report on "Air Safety Oversight Score" was recently released by International Civil Aviation Organisation (ICAO).  $\n$
- It seeks to identify if countries have effectively and consistently implemented the critical elements of a safety-oversight system.
- India has slipped below its previous ranking of 66% to 57%.  $\nphin$
- India is one of the 15 countries that are below the minimum target rates.  $\ensuremath{\sc n}$
- India's score is lower than that of Myanmar, Bangladesh, Maldives, Pakistan, Sri Lanka, Nepal and even North Korea in the Asia-Pacific region.  $\n$
- The only countries that rank below India are small and little known such as Papua New Guinea, Timor-Leste, Vanuatu and Samoa.  $\n$
- A downgrade would mean Indian airlines won't be able to mount new flights to the US or form alliances with US airlines.  $\n$
- This can stifle Indian carriers' plans of global expansion.  $\slashn$

\n\n

# U.S.-Mexico-Canada Agreement (USMCA)

\n\n

∖n

- USMCA is the recently concluded agreement among the countries to replace 25-year-old North American Free Trade Agreement (NAFTA).  $\n$
- It gives the U.S greater access to the dairy markets of canada and mexico and allows extra imports of canada cars.
- Canada managed to preserve the dispute settlement mechanism as a

protection for its wood industry.

∖n

 $\bullet$  This deal covers more than \$1 trillion trade.

\n

- It is intended to last 18 years and will be reviewed every 6 years.  $\slashn$ 

\n\n

### **Commodity Derivatives**

\n\n

∖n

- The Bombay Stock Exchange became the first stock exchange in the country to launch commodity derivatives contract in gold and silver.  $\n$
- Till date, commodity derivatives contracts are available only in the 2 specialsed commodity derivatives - Multi-Commodity Exchange (MCX) and National Commodity Derivatives Exchange (NCDEX).
   \n
- The launch of commodity derivatives platform on the BSE will help in efficient price discovery, reduce timeline and make it cost-effective.  $\n$
- BSE also waived off transaction charges for the first year in the commodity derivatives segment.  $$\n$
- **Derivatives** They are financial contracts that derive their value from an underlying asset.

\n

• These could be stocks, indices, commodities, currencies, exchange rates, or the rate of interest.

\n

- These financial instruments helps to make profits by betting on the future value of the underlying asset. This is why they are called 'Derivatives'.  $\n$ 

\n\n

# **Nobel Prize for Medicine**

\n\n

∖n

• Two immunologists, James Allison of the U.S. and Tasuku Honjo of Japan, won the 2018 Nobel Medicine Prize.

\n

• They won for their work on a new approach to cancer treatment.

\n

• They figured out how to help the patient's own immune system tackle the cancer more quickly.

\n

- It contradicts with traditional forms of cancer treatment that directly target cancer cells.
  - ∖n
- The discovery led to treatments targeting proteins made by some immune system cells that act as a "brake" on the body's natural defences killing cancer cells.

∖n

• T-cells are a type of white blood cell that play a central role in the body's natural immunity to disease.

\n

\n\n

## Polio

\n\n

∖n

- Polio is a highly infectious disease caused by a virus.  $\space{\space{1.5}n}$
- It invades the nervous system, and can cause total paralysis (Acute flaccid Paralysis) in a matter of hours.

\n

- The virus is transmitted by person-to-person spread mainly through the faecal-oral route or, less frequently, by a common vehicle (for example, contaminated water or food).
  \n
- It mainly affects children under 5 years of age. Polio vaccine, given multiple times, can protect a child for life.

\n

- There are three types of polio virus strains P1, P2 and P3.  $\nphin$
- P2 was eradicated globally in 1999. The last case due to type-2 wild poliovirus globally was reported from Aligarh in India in 1999.  $\n$
- India eliminated the type-2 strain in 2016, and the type-2 containing poliovirus vaccine (ToPV) was phased out in April 2016.  $\n$
- Recently, Traces of polio type-2 virus were found in some batches of oral

polio vaccine (OPV) manufactured by a Ghaziabad-based pharmaceutical company.

\n

- Union health ministry has asked the polio surveillance team in Uttar Pradesh to trace all children who were given the vaccine.  $\n$ 

\n\n

#### **Elimination and Eradication**

\n\n

∖n

- Elimination means stopping the transmission of a disease in a specific geographic area or country, but not worldwide.  $\n$
- Disease eradication is the permanent reduction of a disease to zero cases through deliberate measures such as vaccines.  $\n$
- Once a disease has been eradicated, intervention measures are no longer needed.
