### **Chagos Island**

\n\n

\n

- There is a dispute between Mauritius and UK over the sovereignty of Chagos islands in the Indian Ocean.

\n

- It is home to Diego Garcia, the key military base of the U.K. and the U.S. in the Indian Ocean.

- \n
- The island was taken by UK before the Mauritius decolonisation.
- \n
- After the Independence in 1968, most of the islanders were deported to give the island in lease to US for its airbase.
- \n
- The evicted islanders have been campaigning for their right to return home.
- \n
- A resolution by Mauritius was passed in UN general assembly asking the International Court of Justice (ICJ) to offer a legal opinion in the issue.
- \n
- Twenty-two countries and the African Union are going to appear before ICJ to give their statements.
- \n
- India has backed Mauritius over its claim on the disputed Chagos islands.
- \n
- Australia and the United States are expected to back Britain's position.

## **Mid-Air Refuelling**

\n\n

- \n
- Tejas is an indigenously developed light combat aircraft.
- \n
- It is a single-seat, single-jet engine, multirole light fighter.
- \n
- It is the smallest and lightest multi-role supersonic fighter aircraft in its class.
- \n
- It can fire Air to Air Missiles, carry bombs and Precision Guided ammunition.
- \n
- The Indian Air Force has successfully carried out the first ever mid-air refuelling of Tejas.
- \n
- A Russian-built IL-78 MKI tanker transferred fuel to a Tejas MK I aircraft.
- \n
- It is considered as a major milestone in its development cycle.
- \n
- The ability to carry out air-to-air refuelling is one of the critical requirements

for Tejas to achieve final operational clearance.

\n

- Earlier, Tejas has successfully fired an air-to-air beyond visual (BVR) range missile.

## **FOXSI Mission**

\n\n

\n

- Focusing Optics X-ray Solar Imager (FOXSI) is a sounding rocket mission by NASA.

\n

- It aims at directly focus at Sun and search for nanoflares using its X-ray vision.

\n

- The mission's third flight is going to be launched soon.

\n

- FOXSI rockets travel above the Earth's atmosphere for a peek at space before falling back to the ground.

\n

- It is the first instrument built specially to image high-energy X-rays from the Sun by directly focusing them.

\n

\n\n

## **Nanoflares**

\n\n

\n

- Nanoflares are miniature explosions invisible to the naked eye.

\n

- They are born when magnetic field lines in the Sun's atmosphere tangle up and stretch until they break like a rubber band.

\n

- Consequence - The energy they release accelerates particles to near light speed and heats the solar atmosphere to its searing million-degree Fahrenheit temperature.

\n

\n\n

## **Integrated Development of Wildlife Habitats (IDWH)**

\n\n

\n

- The Cabinet Committee on Economic Affairs has recently approved continuation of the IDWH beyond the 12th Plan period from 2017-18 to 2019-20.

\n

- It is a centrally sponsored umbrella scheme consists of Project Tiger, Development of Wildlife Habitats and Project Elephant.

\n

- The schemes would result in overall strengthening/ consolidation of tiger, elephant and wildlife conservation in the country.

\n

- Besides, it would also address the Man-Animal conflict effectively and benefit the communities relocating from core protected areas.

\n

- The implementation of the schemes would be done through the respective States in designated Tiger Reserves, Protected Areas and Elephant Reserves.
