Mycobacterium indicus pranii (MIP)

\n\n

\n

- MIP is a non-pathogenic bacteria.
- In its heat-killed form, it acts by sprucing up the body's immunity.
- It has received approval as a leprosy vaccine from the Indian drug regulator, Central Drugs Standard Control Organisation, and the US Food and Drug Administration (FDA).
- Apart from leprosy, it is also being tried as a vaccine against bladder cancer, warts, lung cancer and TB.
