### **World Summit on Accreditation**

\n\n

\n

- Union Human Resources and Development ministry has recently inaugurated world summit on Accreditation.

\n

- The summit is a biennial Summit organised by National Board of Accreditation (NBA).

\n

- The summit provides platform to stakeholders to share their knowledge and information on accreditation.

\n

- NBA has already organised three Summits in 2012, 2014 and 2016.

\n

\n\n

### **National Board of Accreditation**

\n\n

\n

- NBA is an autonomous organisation under Ministry of Human Resource Development.

\n

- It engaged in quality assurance of the programs offered by the professional and technical institutions in India through accreditation.

\n

- It has been accorded Permanent Signatory Status of Washington Accord since June, 2014.

\n

- It has adopted internationally implemented outcome-based assessment and accreditation to ensure the graduates are globally competent.

\n

\n\n

### **Dawn Mission**

\n\n

- \n
- Dawn mission was launched by NASA deploying spacecrafts to study the asteroid Vesta and dwarf planet Ceres.
- \n
- It is the only mission ever to orbit two extraterrestrial targets and will characterize the early solar system and the processes that dominated its formation.
- \n
- Vesta and Ceres are celestial bodies believed to have accreted early in the history of the solar system.
- \n
- Dawn orbited giant asteroid Vesta for 14 months from 2011 to 2012, then continued on to Ceres, where it has been in orbit since March 2015.
- \n
- The spacecraft is likely to run out of a key fuel known as hydrazine which keeps it oriented and in communication with Earth.
- \n

\n\n

## **Ceres and Vesta**

\n\n

- \n
- Ceres is the earliest known and smallest of the dwarf planet.
- \n
- It is also the largest object in the asteroid belt between Mars and Jupiter.
- \n
- Thus Ceres is both dwarf planet and asteroid.
- \n
- Vesta is the second most massive body in the asteroid belt, surpassed only by Ceres.
- \n

\n\n

## **Indo-France Space Relationship**

\n\n

- \n
- France has offered India its expertise in space medicine, astronaut health monitoring, life support and radiation protection for India's proposed manned space mission - Gaganyaan.
- \n
- French space agency (CNES) has already launched human spaceflights in its Proxima mission in 2016.

\n

- The partnership will also allow the French space agency to learn from India's developments in the field of crew transport.

\n

\n\n

## **Wind Power Generation**

\n\n

\n

- India has set an offshore wind power capacity target of 5 GW by 2022 and, 30 GW by 2030.

\n

- As per the estimates of the Institute for Energy Economics & Financial Analysis (IEEFA), both China and India will ride the offshore wind power wave

\n

- India's offshore wind power generation capacity is seen climbing to 30 GW by 2030, on par with China.

\n

- It accounts for 30 per cent of the envisaged capacity of 100 GW in Asian economies.

\n

- The balance capacities will be contributed by South Korea , Japan, Taiwan and the rest to be added up jointly by Indonesia, Philippines and Vietnam.
