Opportunity Rover

\n\n

\n

- Opportunity Rover was launched by NASA in 2003 to land in red planet Mars.

\n

- The rover landed in 2004 and begin traversing the planet in search of signs of past life.

\n

- It is still actively exploring the Martian terrain.

\n

- It was originally planned for 90-day mission. But it has far outlasted its planned mission by 55 times longer than originally planned.

\n

- Mars is prone to dust storms due to its thin atmosphere and desartic conditions.

\n

- Recently, it witnessed an immense dust storm which led to the impenetrable, perpetual night in the planet.

\n

- Since, opportunity rover is a solar powered, the amount of light the spacecraft receives has dropped to less than 1 percent of normal levels.

\n

- Before the storm began, it had been rolling down a channel called **Perseverance Valley**, which scientists think may have been carved by water billions of years ago.

\n

- **Curiosity** - It is also a rover deployed by NASA in its Mars Exploration Program in 2012 to assess whether Mars ever had an environment able to support small life forms called microbes.

\n

- The rover captured **mesas and buttes** on mars geological layer called as Murray formation, which is formed from the lakebed mud deposits.

Animal Welfare Board of India

\n\n

\n

- It is a statutory, advisory body established under Prevention of Cruelty to Animals (PCA) Act, 1960.

\n

- It is within the jurisdiction of the Ministry of Environment, Forest and Climate Change.

\n

- It ensures implementation of the animal welfare laws in the country and provides grants to animal welfare organizations and advice the Centre, States and UTs on animal welfare issues.

\n

- As per the Act, the Board comprises of 28 Members including 6 MPs (4 from Lok Sabha and 2 from Rajya Sabha) with the term of 3 years.

\n

- It is headquartered at Ballabgarh in Haryana.

\n

- Last year, the government has notified that the board will be permanently chaired by senior official from the ministry of environment.

\n

- Recently, the board has issued directives to all the state departments to save stray animals from cruelty.

\n

- Thus, the responsibility of protecting stray animals is given to state departments. Previously it was the responsibility of cow shelters and animal activists.

\n

- The board does not have the right to prescribe punishments or fines for violations of the PCA Act but can pursue legal action.

\n

\n\n

Swajal Yojana

\n\n

\n

- Swajal yojana was recently launched by Ministry of Drinking Water and Sanitation in 115 aspirational districts in the country.

\n

- It is a community owned drinking water programme for sustained piped drinking water supply powered by solar energy.

\n

- It ensures the availability of clean drinking water to every household round

the year.

\n

- The scheme will train hundreds of rural technicians for operation and maintenance of Swajal units which generates employment in the rural areas.
- Under the scheme, 90% of the project cost will be taken care by the Government and the remaining 10% of the project cost will be contributed by the community.
- The operations and management of the project will be taken care by the local villagers.

\n

\n\n

Central Adoption Resource Authority

\n\n

\n

- It is a statutory body under the Ministry of Women and Child Development.
- It functions as the nodal body for adoption of orphan, abandoned and surrendered children and is mandated to monitor and regulate the same.
- **Hague Convention on Inter-country Adoption, 1993** was ratified by the Govt of India in 2003.
- In accordance with the provisions of the convention, CARA was designated as the Central Authority to deal with inter-country adoptions.
- It has recently **barred partners in live-in relationships** from adopting a child on the ground that cohabitation without marriage is not considered a stable family in India.
- It permits a single woman to adopt a child of any gender, while single men can adopt only boys.
- In case an applicant is married, both spouses must give their consent for adoption and should be in a stable marriage for at least two years.

Composite Water Management Index

\n\n

Click [here](#) to know about the index.

\n\n

- \n
- The index is developed by NITI Aayog and it ranked states on how well they managed water.
- \n
- It comprises 9 broad sectors with 28 different indicators covering various aspects of groundwater, restoration of water bodies, irrigation, farm practices, drinking water, policy and governance.
- \n
- According to the recent report, Gujarat, Madhya Pradesh and Andhra Pradesh have managed water resources efficiently.
- \n
- Meghalaya, Uttarakhand and Nagaland are the bottom three states in the index.
- \n
- While Tripura has emerged as top performer in north-east, Rajasthan has emerged as the best performer in the incremental progress over last two years.
- \n
- Some of the other important findings from the recent report are,
- \n

\n\n

- \n
1. India is facing its “worst” water crisis in history and that the demand for potable water will outstrip supply by 2030, if steps are not taken.
- \n
2. 21 cities, including Delhi, Bengaluru, Chennai and Hyderabad, will run out of groundwater by 2020, affecting 100 million people.
- \n
3. Critical groundwater resources, which accounted for 40% of the water supply, are being depleted at “unsustainable” rates and up to 70% of the supply is “contaminated”.
- \n
