### European Union Film Festival

\n\n

\n

- India is set to host 23<sup>rd</sup> European Union Film Festival this year.  
\n
- It is organized by Directorate of Film Festivals, Ministry of Information and Broadcasting.  
\n
- The festival will traverse through 11 cities in India including New Delhi, Chennai, Port Blair, Pune, Puducherry, Kolkata, Jaipur, Visakhapatnam, Thrissur, Hyderabad and Goa.  
\n
- It will showcase movies with a selection of 24 latest European films from 23 EU Member States.  
\n
- The **European Union** is a political and economic union consists of 28 countries.  
\n
- It has the world's largest economy and its third largest population, after China and India.  
\n
- A monetary union has been established within union but lacks common Fiscal union.  
\n
- The **Maastricht Treaty** established the European Union in 1993 and introduced European citizenship.  
\n
- The latest major amendment to the constitutional basis of the EU, the **Treaty of Lisbon**, came into force in 2009.  
\n
- The Lisbon Treaty now contains a clause under Article 50, providing for a member to leave the EU.  
\n
- United Kingdom enacted the result of a membership referendum in June 2016 and is currently negotiating its withdrawal.  
\n

## Monsoon and Pollution

\n\n

- \n
  - Monsoon plays a critical role in flushing out pollutants over Asia apart from being an essential source of water for Indian Agriculture.
- \n
  - Increasing temperature over the period amplifies the seasonal heating of the Tibetan Plateau.
- \n
  - This led to increased warming in the Upper Troposphere during late spring and early summer.
- \n
  - It subsequently spurring enhanced monsoon rainfall over northern India during June and July.
- \n
  - Scientists have pointed out, increased loading of black carbon in spring enhances the monsoon.
- \n
  - But a recent study has found that increased pollution particularly from coal burning could potentially weaken this ability of the monsoon.
- \n
  - Black carbon particles from coal burning may increase cloudiness and surface cooling of sea surface which can reduce the moisture flux into the monsoon convection, i.e. weaken the monsoon.

\n\n

## Pinaka

\n\n

- \n
  - Pinaka Mark I is an indigenous multi-barrel **unguided rocket** launch system developed by DRDO for firing of multiple warheads.
- \n
  - It was used in the 1999 Kargil conflict. It has a range of 40 km.
- \n
  - It was later transformed in to a short-range precision **guided missile** and thus renamed as Guided Pinaka – Mark II.
- \n
  - It has high accuracy and equipped with a navigation, guidance and control system with a range of 70 to 80 km.

- \n
- The missile is currently undergoing trials and expected to be delivered to the Army in two years.

\n

\n\n

## **Multi-barrel rocket Vs Guided Missile**

\n\n

- \n
- A Multiple rocket launcher is a type of rocket artillery system with multiple warheads and it was launched simultaneously by an unguided system.
  - Guided Missile is a self propelled and launched by a precision guided system and it has 4 components such as targeting/missile guidance, flight system, engine and warhead.

\n

\n\n

## **Apache Helicopters**

\n\n

- \n
- Apache Helicopters are developed by USA which belongs to heavy helicopter weighing more than 5 tonnes.
  - India signed procurement plan of Apache helicopters with USA in 2015.
  - Recently, the U.S. State Department approved the sale of six additional AH-64 Apache attack helicopters to India for the Army.
  - Currently, the Army operates only smaller Cheetah and ALH (Advanced Light Helicopters) that weigh less than 5 tonnes.
  - All bigger helicopters, including the Mi-35 attack helicopters, and fixed-wing aircraft are operated by the Indian Air Force (IAF).
  - Under the present procurement plan, the IAF will operate 22 Apache attack helicopters, while the Army will have 6 of them.
