Autism Spectrum Disorder

Indian researchers have developed a compound called "6BIO" that can provide a better method to treat Autism Spectrum Disorder (ASD) / Intellectual disability (ID).

- This compound has potential for improving daily activities like learning and recollecting new tasks in patients with ASD/ ID.
- ASD is the name for a group of developmental disorders that includes a wide range, "a spectrum" of symptoms, skills, and levels of disability.
 - Fragile X Syndrome (FXS) is the leading inherited cause of autism in 4% of the global population.
- ASD includes conditions that were previously considered separate - autism, Asperger's syndrome, childhood disintegrative disorder and an unspecified form of pervasive

developmental disorder.

- People with ASD often have these characteristics:
 1. Ongoing social problems that include difficulty in communicating and interacting with others.
 2. Repetitive behaviours as well as limited interests or activities.
 3. Symptoms that typically are recognized in the first 2 years of life.
 4. Symptoms that hurt the individual's ability to function socially, at school or work, or in other areas of life.

Glasgow Climate Deal

The Glasgow Climate Deal has been made with a last-minute change.

- Under the Glasgow climate pact:
 1. Big carbon polluting Countries were asked to republish their climate action plans by the end of 2022, with stronger emissions reduction targets for 2030
 2. There is an emphasis on the need for developed countries to increase the money they give to those already suffering the effects of climate change - beyond the current \$100bn annual target and
 3. A pledge in a previous draft to "phase out" coal was instead watered down to a commitment to "phase down" coal.
- The 'phase down' change will make it harder to achieve the international goal to limit warming to 1.5°C (2.7°F) since pre-industrial times.
- In addition to the revised coal language, the Glasgow Climate Pact included enough financial incentives to almost satisfy poorer nations and solved a long-standing problem to pave the way for carbon trading.
- UN's criteria - Ahead of the Glasgow talks, the United Nations had set 3 criteria for success, and none of them were achieved. They are,
 - a. Pledges to cut carbon dioxide emissions in half by 2030,
 - b. \$100 billion in financial aid from rich nations to poor, and
 - c. Ensuring that half of that money went to helping the developing world adapt to the worst effects of climate change.

Sabz Burj

Sabz Burj has been conserved and restored over the last 4 years using traditional materials and building-craft techniques favoured by 16th century craftsmen.

- Built in 1530, Sabz Burj is one of the earliest Mughal-era monuments in Delhi.
- The tomb does not have any markings pointing to the identity of those buried under it.
- However, it is of immense significance due to the ceiling on its double dome structure painted in pure gold and lapis, which is the earliest surviving painted ceiling for any monument in India.
- The painting on the ceiling that has floral motifs predates similar work that was seen in miniature paintings and textiles from the Mughal era.
