### Polar Science and Cryosphere Research (PACER)

*Recently, India's 1<sup>st</sup> winter scientific expedition to the Arctic has been flagged off from the MoES headquarters in New Delhi.*

- It is a **Central Sector** umbrella scheme.
- **Implemented by** - Ministry of Earth Sciences (MoES) through [National Centre for Polar and Ocean Research \(NCPOR\)](#), Goa.
- **Objectives** - To promote long-term scientific programmes in the ***polar region and the surrounding oceans*** that have potential societal, strategic and global relevance.
- To plan, coordinate and implement the *annual expeditions*.
- To *establish polar research* and logistic facilities in the country and to *maintain Indian research bases* at Antarctica, Arctic and Himalaya.

#### 4 sub-schemes under PACER

- **Indian Antarctic Program** - It was *conceived in 1981* initiated under the Department of Ocean Development (DOD) attached to Prime Minister's Office (PMO).
- 3 permanent Indian research bases, ***Dakshin Gangotri-1983, Maitri-1988 and Bharati-2012*** have been built.
- **Indian Arctic Program** - Its *foundation was laid in 2007* and it established its ***Arctic research station, Himadri in 2008***.
- Its research includes atmospheric, biological, marine and glaciological studies.
- **Indian Scientific Expeditions to the Southern Ocean (ISESO)** - It was initiated to pursue multi-disciplinary, multi-institutional research activities addressing key scientific components like
  - Air-sea interactions, lower atmospheric processes, hydrodynamics, biogeochemistry, biodiversity, etc.
- **Cryosphere and Climate** - It was initiated *during 12th 5-year plan* that have enhanced our understanding of the Antarctic cryosphere and the climate variability.

#### Noma

Recently, the World Health Organization (WHO) has added the health challenge noma to its official list of neglected tropical diseases (NTD).

- It is a severe ***gangrenous disease of the mouth and face***.
- **Origin** - Greek word "*nomē*", meaning '*to devour*', as noma eats away facial tissue and bones if not treated early.
- It is also known as ***cancrem oris or gangrenous stomatitis***.
- **Susceptible population** - *Children aged 2-6 years old*.
- **Spread** - In developing countries, especially in sub-Saharan Africa.

WHO website lists the 'latest' estimates 140,000 cases per year and a prevalence of 770,000 cases. However, the data dates back to 1998.

- **Risk factors** - Poor oral hygiene, malnutrition, weakened immune systems, infections, and extreme poverty.
- While it is not contagious, it prefers to attack when the body's defences are weak.
- **Symptoms** - It begins with *gum inflammation* and leads to *facial disfigurement*, spasm of the jaw muscles, oral incontinence and *speech problems*.
- **Oral contamination by** - Bacteroidaceae and a consortium of other microorganisms
- **Higher mortality rate** - Approximately 90% as many children are not given care or brought for care in time.
- **Prevention and treatment** - Its spread can be slowed with basic hygiene, measles vaccination, antibiotics, rehydration, correction of electrolytic imbalances and nutritional rehabilitation.
- **Significance of NTD status** - It will amplify global awareness, catalyse research, stimulate funding, and boost efforts to control the disease through multisectoral and multi-pronged approaches.

*Noma is also called as 'Face of poverty' as effective drugs like sulfonamides and penicillin and adequate surgical treatment for the effects remain inaccessible for many due to extreme poverty.*

## Migration and Development Brief

*The latest Migration and Development Brief reveals a continuing growth in remittance flows to low- and middle-income countries (LMICs) in 2023, albeit at a slower pace compared to previous years.*

- The brief is a **biannual report**.
- **Prepared by** - The Migration and Remittances Unit, Development Economics (DEC).
- **Released by** - World Bank.
- **Objectives** - To provide the information about *migration and remittance flows* and related policies over the past 6 months and to provide *medium-term projections* of remittance flows to developing countries.

## Key findings of the report

- **Remittances** - It grew by an estimated 3.8% in 2023, reaching a total of USD669 billion in LMICs.
- A 7.2% increase in South Asia with notable contribution by India.
- A decline for the 2<sup>nd</sup> consecutive year in Middle East and North Africa, driven by a sharp drop in flows to Egypt.
- A decrease of 1.4% after a significant gain in 2022 in Europe and Central Asia.
- **India** - It remained as the **largest recipient** with an estimated USD125 billion in

2023.

*The top 5 remittance recipient countries include India, Mexico, China, Philippines, and Egypt.*

- *Resilient labour markets* in advanced economies and Gulf Cooperation Council (GCC) countries supported migrants' ability to send money home.
- There is a potential *risk of a decline in real income for migrants* in 2024 due to global inflation and low growth prospects.
- *Banks continue to be the costliest channel* for sending remittances, with an average cost of 12.1%.
- **Recommendation** - To *leverage remittances for development finance*, particularly through **diaspora bonds** to tap into diaspora savings held in foreign destinations.
- It emphasized on the *need for inclusive labour markets and social protection policies* to sustain remittance flows.

## Other Important News

### National Geoscience Data Repository Portal

- Ministry of Mines is set to launch the National Geoscience Data Repository (NGDR) Portal in a ceremony in New Delhi.
- NGDR is a comprehensive online platform for accessing, sharing, and analyzing geospatial information across the nation.
- The initiative is spearheaded by the Geological Survey of India (GSI) and Bhaskaracharya Institute of Space Applications and Geoinformatics (BISAG-N).
- **Geological Survey of India (GSI)** is a scientific agency that conducts geological surveys and studies of India established in **1851 by Thomas Oldham**.

### Reykjanes peninsula

- A recent report of Iceland's Meteorological Office said that volcanic eruption began in Iceland, south of the capital Reykjavik.

- Iceland is home to **33 active volcano systems**, the highest number in Europe.

### Bonnet macaque (*Macaca Radiata*)

- The bonnet macaque is a species of Old-World monkey that is native to southern India. They are also known as Zati.
- They are **highly arboreal** and most abundant on the outskirts of human settlements.
- **Subspecies** - Dark-bellied bonnet macaques (*Macaca radiata radiata*) and Pale-bellied bonnet macaques (*Macaca radiata diluta*).
- **Conservation Status**
  - IUCN - Vulnerable.
  - CITES - Appendix II.

### Goa Liberation Day

- Goa Liberation Day is celebrated on **December 19<sup>th</sup>** every year.
- It marks the day in 1961 when India reclaimed the coastal state from centuries of Portuguese rule.
- On December 19, 1961, Goa officially became part of India and was declared as a Union Territory along with Daman and Diu after a military operation called "**Operation Vijay**".

### Forest Fringe Villages

- Forest fringe villages are villages that are located near forest areas.
- They often depend on the forest for their daily needs and biomass.
- As per India State of Forest Report- 2019, published by Forest Survey of India, approximately 300 million people are dependent on forests.
- It roughly says that 26% of the total 650,000 villages can be classified as forest fringe villages, home to around **22% of the country's total population**.

### **Kuno National Park**

- Wildlife officials from Madhya Pradesh has recently released 2 male cheetahs, named ***Agni and Vayu***, into the safari area at Kuno National Park.
- Kuno National Park is a wildlife sanctuary and national park in Madhya Pradesh established in 1981 and is named after the ***Kuno River***.
- The park is located in the ***Central Indian Vindhyan Hills & the only national park in India that is home to Cheetahs***.
- The Wildlife Institute of India (WIT) and the Wildlife Trust of India (WTI) selected Palpur-Kuno park as a habitat for Asiatic lions and cheetahs.

### **International Migrants Day**

- International Migrants Day is observed on ***December 18<sup>th</sup>*** each year.
- ***Theme*** of International Migrants Day, 2023 - ***Act Today***.
- The United Nations General Assembly proclaimed the day in 2000 to recognize the contributions of migrants and the challenges they face.
- The ***International Organization for Migration (IOM)*** is a UN-related agency that highlights the contributions and challenges of the migrants worldwide.

### **Domestic Cats**

- A recent study says that free-ranging domestic cats, one of the ***most invasive species***, were threat to conservation.
- They eat 2,084 species globally & pushing some species even to extinction.
- Among those species almost half of the species were birds, followed by reptiles and mammals.
- They identified that the species consumed by cats are of 16.65% of which are near-threatened or of higher concern on the International Union for Conservation of Nature (IUCN) Red List.
